BUILDING INFRASTRUCTURES

# Pop-up

**P**op-ups provide real ease of use and quick connection for mobile devices: laptops, smartphones, tablets, audio and video systems, etc. Users have a choice of both power and data connections within easy reach.

## KNOW MORE

Pop-ups can take a wide range of functions available in the Arteor range, thus complying with specific requirements, such as fast charging of portable devices.

Arteor 20 W USB Type-C Power Delivery chargers are specifically designed to charge all devices even faster! They can optimise charging by automatically selecting the most suitable voltage for the device battery.

## SLEEK DESIGN

Extra-slim format to blend discreetly into the furniture. The flush-mounted part takes up little space, even allowing installation above a drawer.

## ELEGANT FINISHES

A set of finishes in harmony with both the furniture and the décor.

### TIMELESS FINISHES

## SAFETY AND EASE OF USE

Wide button and cover with damper for smooth opening. IP44 version (with closed cover) for good protection in the event of accidental contact with liquids, on pop-ups with 4 and 8 modules.

## FUNCTIONALITY AND FLEXIBILITY

Available in 4 and 8-module versions to be equipped with power or data Arteor functions.
