## BROWSING BY ROOM

Easy and intuitive navigation between rooms.

## ENERGY MANAGEMENT

Energy consumption display with clear information

For more details on the energy management function see p. 10/11

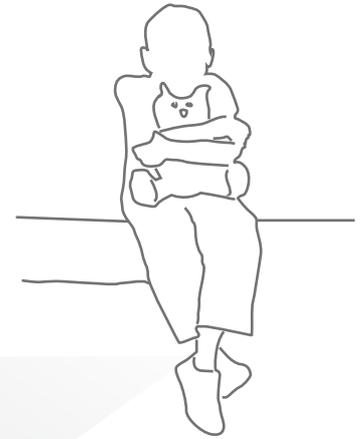

# THE PERFECT COMBINATION OF COMFORT, SAFETY AND ENERGY EFFICIENCY

## UNIVERSAL DIMMER

Also see  
p. 12/13

Suitable for all types of modern loads including dimmable CFLs and LEDs.

Its nightlight function makes the universal dimmer the ideal choice for bedrooms or children's rooms: Once switched ON at a preset level (e.g. 33%) the light will fade gradually for one hour until it turns completely OFF.

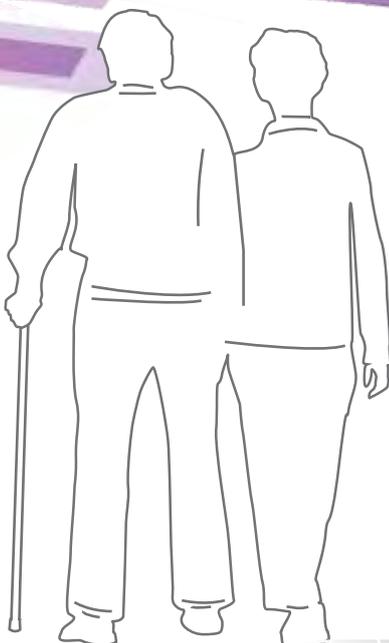

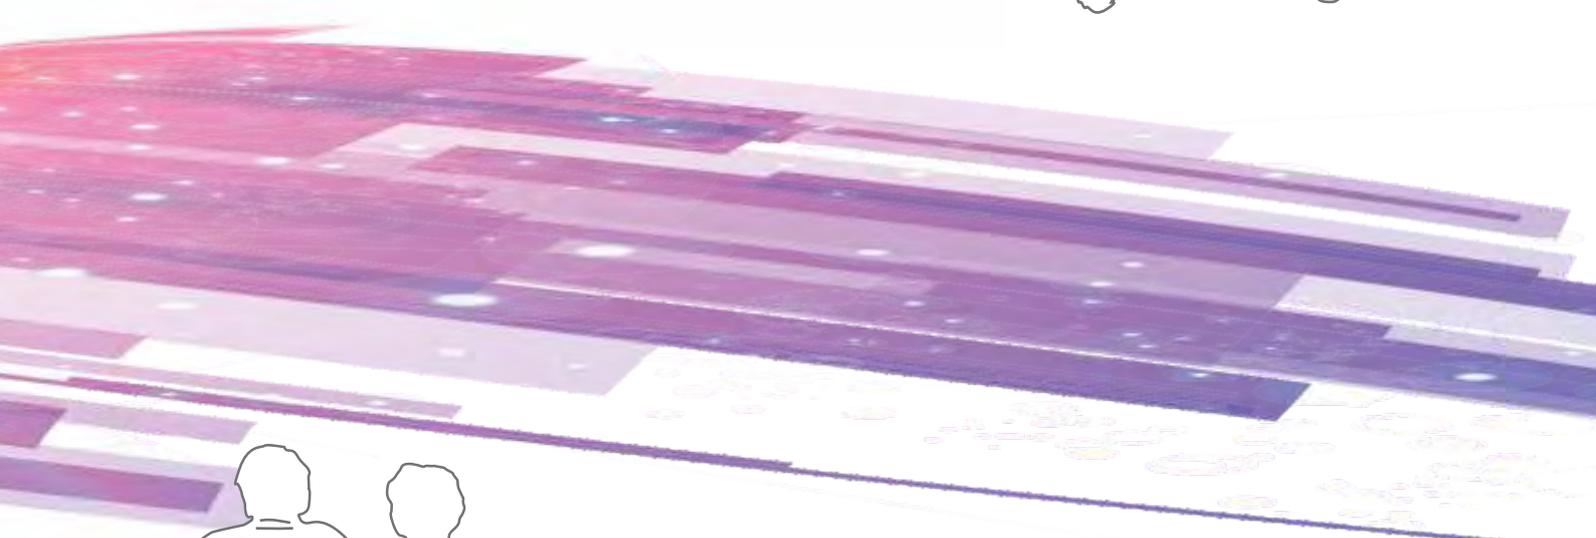

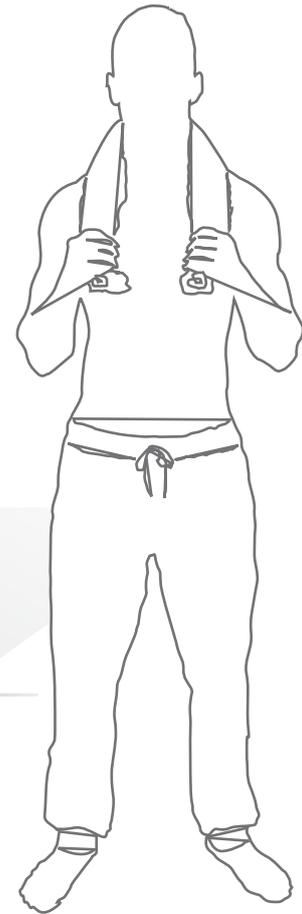

## 8 PUSHBUTTON CONTROL

The BUS-based 8 push-button control allows to control 8 functions or scenarios tailored to the user's needs. Symbols can be customised - for clear and easy identification of the functions or scenarios.

### DISPLAY THERMOSTAT

Temperature control set individually in each room or centrally (in combination with a central unit), for certain areas or the whole house. Possibility of fan coil control.

### SKIRTING LIGHT WITH MOTION DETECTOR

Installed in passageways, these skirting lights with their built-in motion detector allow to create illuminated paths. By helping to find one's bearings in the dark without having to switch on the light, they contribute to preventing injury through falls. Placed at the foot of the bed, they enable safely moving around at night without waking up any other person sleeping in the same room.

# NEAT INSTALLATION FOR A PERFECT HOME CINEMA EXPERIENCE

Large, modern flat screens offer much more than just first class HD image quality. Mounted on the wall, they become an aesthetically attractive solution even in small rooms – if a few points are considered when planning the home cinema system.

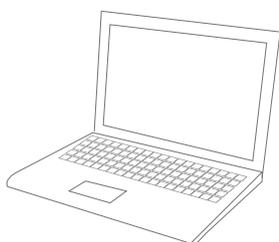

## TV SOCKET

Ensures connection for radio, TV and satellite sources

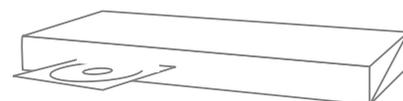

## HOME CINEMA CONNECTIVITY NO MORE CABLE JUMBLE

All connections needed between the screen and other devices like a DVD player, PC or games console should be identified beforehand, as exposed cables would disrupt the visual effect. This way the necessary multimedia sockets (RJ 45, RCA, HDMI, loudspeaker sockets, etc.) can be positioned properly and cables can be installed in the wall. As more and more devices need to be connected to power - make sure to plan a sufficient number of sockets as well.

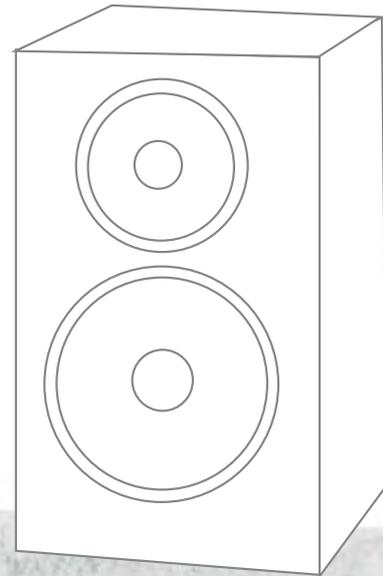

HDMI sockets allow to transmit high definition digital audio/video streams from a DVD/Blue-Ray player or computer to a compatible screen (LED, LCD etc.)

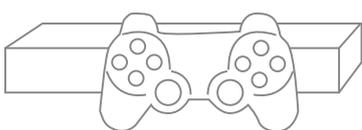

Only a perfect sound rendition makes your home cinema experience really complete. For a cinema-like surround sound, at least 5 loudspeakers need to be distributed around the room. Ideally, with no cables cluttering the space. This can be achieved easily through the use of loudspeaker sockets - if the connection is anticipated at the planning stage.

#### LOUDSPEAKER SOCKET

For a perfect sound rendition – and no risk of tripping over cables.

Game consoles can be connected to the screen via HDMI connectivity.

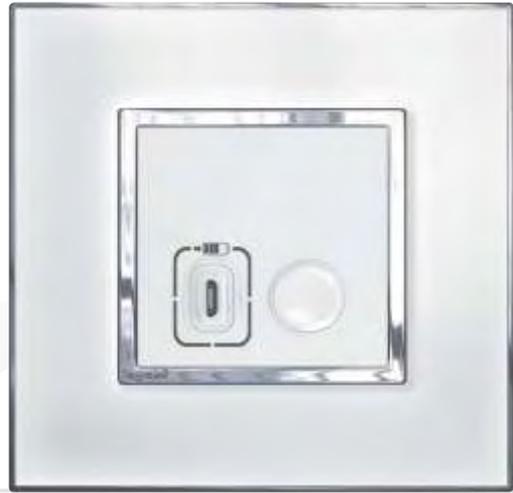

# MORE MOBILITY

## USB POWER SUPPLY WHEREVER IT'S HANDY

## Wi-Fi access points

### Installation principle

### Wi-Fi access points

#### A 802.11 a and b/g solution

Radio communication standard	802.11 b/g	802.11 a
Power over Ethernet standard	802.3 af	
Frequency band	2.4 GHz	5 GHz
Number of available channels	13	8
Max. data rate	54 Mbps	

### Benefits of a Legrand Wi-Fi access point

- Possibility of simultaneous operation on 2 frequencies, 2.4 GHz and 5 GHz
- Provides a max. data rate of up to 2 x 54 Mbps in simultaneous mode
- Very high security level: encryption (WPA2 - 802.11i) and authentication (802.1x)
- Possibility of roaming (moving from one access point to another without breaking the link)
- Easy to configure and make secure with the quick configuration node
- Guest access: allows visitors specific access to the Internet (special SSID given access to Internet only, not to local network)
- The LCS<sup>2</sup> RJ 45 connector is included in the product
- Need no additional RJ45 socket and cord

### Installation

In all supports that can take an Arteor mechanism (ducting, columns, flush-mounting boxes, floor boxes, etc)  
 Do not place access points behind an obstacle that would limit the radiation of the antenna  
 Access points are connected in the same way as LCS<sup>2</sup> RJ 45 sockets

### Sizing

The number of access points, depends on the configuration, sizing and materials of the building as well as the number of users on each area to cover and any interferences
