DIGITAL BUILDING INFRASTRUCTURES

 **legrand**®

THE NEW DX³ OFFER

Legrand offers you leading-edge technical features with its new DX³ range of modular circuit breakers.

This range, up to 125 A, is suitable for all residential, commercial and industrial applications which require high performance, selectivity and back-up combination of devices. In this document, discover the innovations of this new range which will enable you to build more reliable, higher performance and more economical distribution boards.

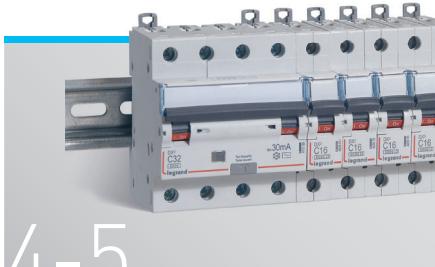

PROTECTION/BREAKING

2-3

A clear, comprehensive offer for all types of application

4-5

Performance that meets your requirements

6-7

Clear identification of each circuit

8-9

Impeccable quality

14-15

Easy, safe connection

CONTROL

22-23

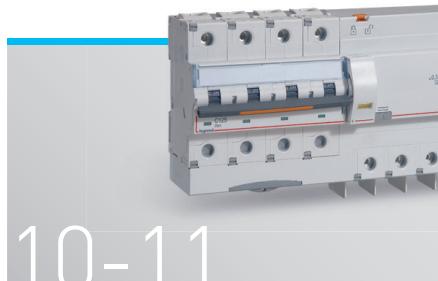

More comfortable buildings
and energy savings

MEASUREMENT

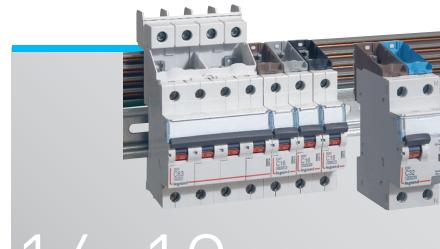

24-25

Measurement at the heart
of energy efficiency

10-11

Protection tailored to
your requirements

LEGRAND, A CLEAR, COMPREHENSIVE OFFER FOR ALL TYPES OF APPLICATION

The new DX³ circuit breakers

can be integrated in a wide range of products, providing exceptional technical and economic performance levels

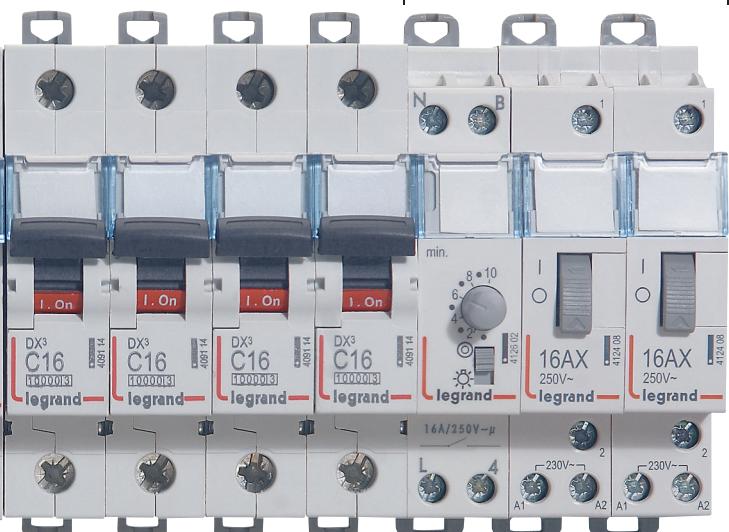

The variety of functions and range of characteristics offered will enable you to equip all your distribution boards. The very high levels of coordination between the various ranges of DX³ modular circuit breakers or between DX³ modular circuit breakers and DPX³ MCCBs enable the cost of the installation to be optimised.

MEASUREMENT

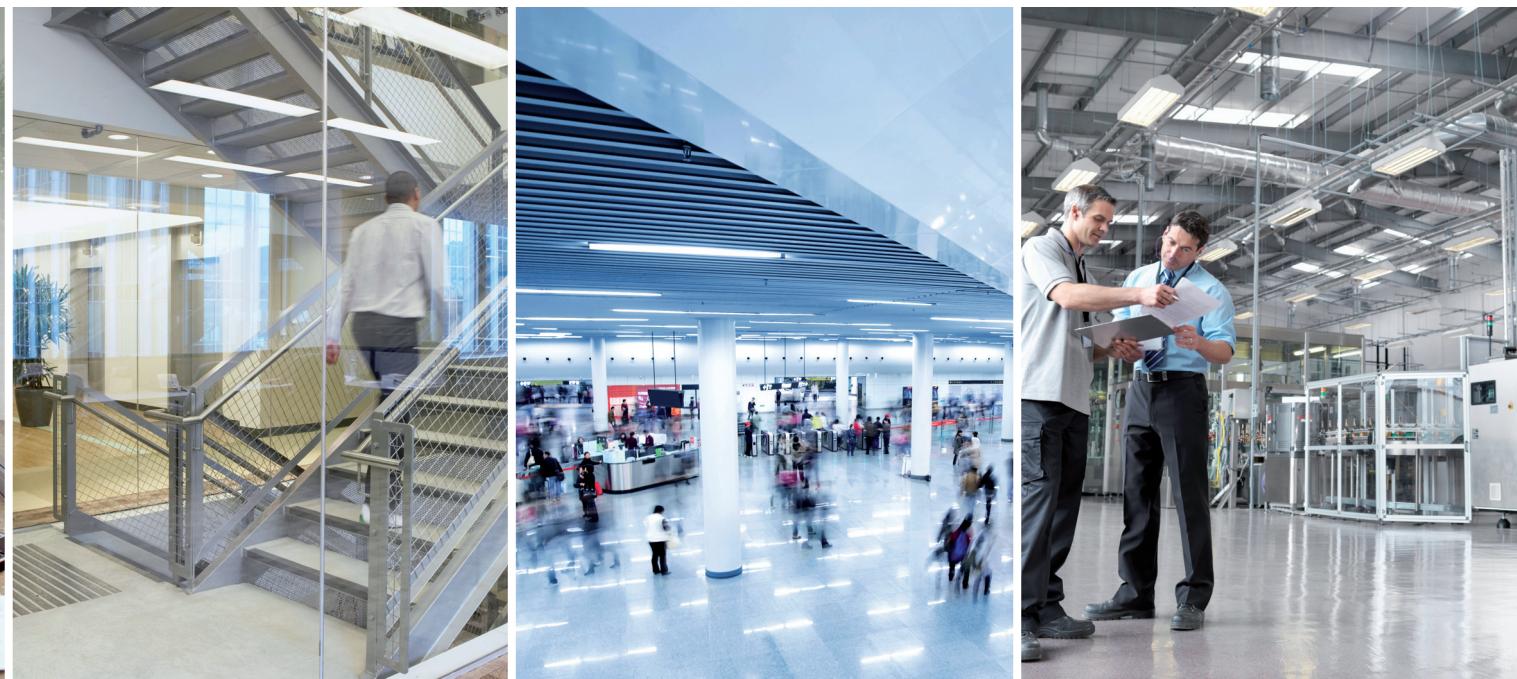

PROTECTION/BREAKING

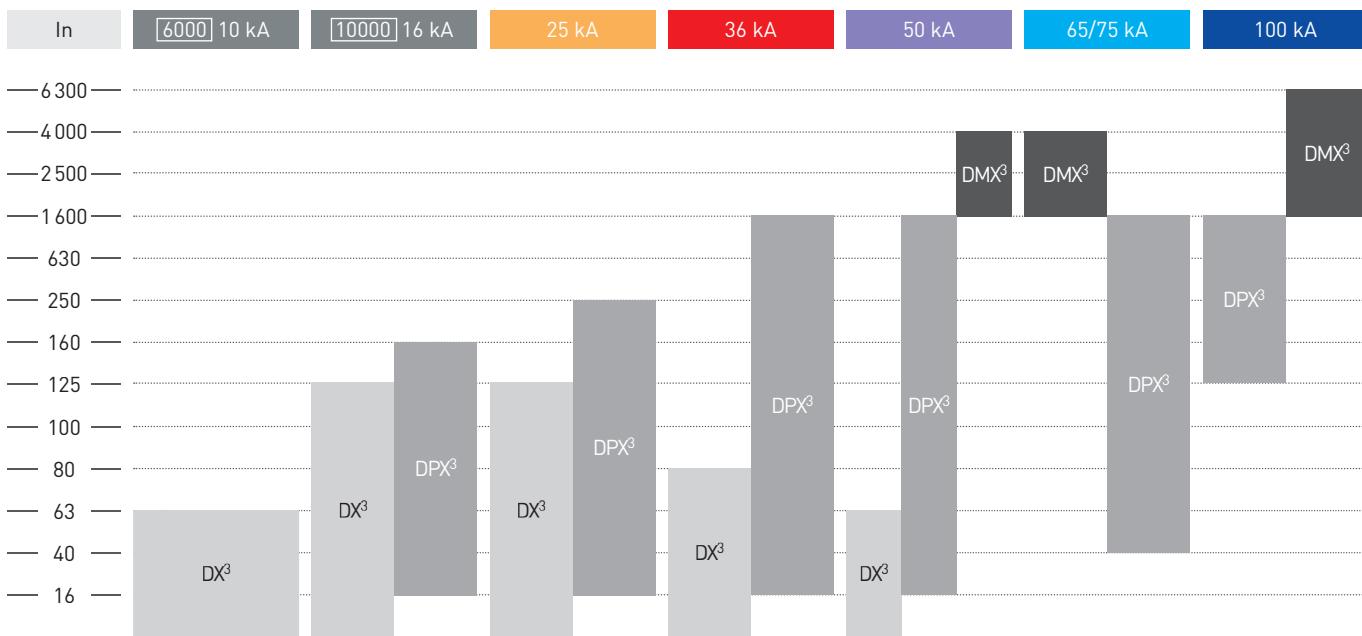

CONTROL

All functions on DIN rail

Each breaking capacity has its own power solution

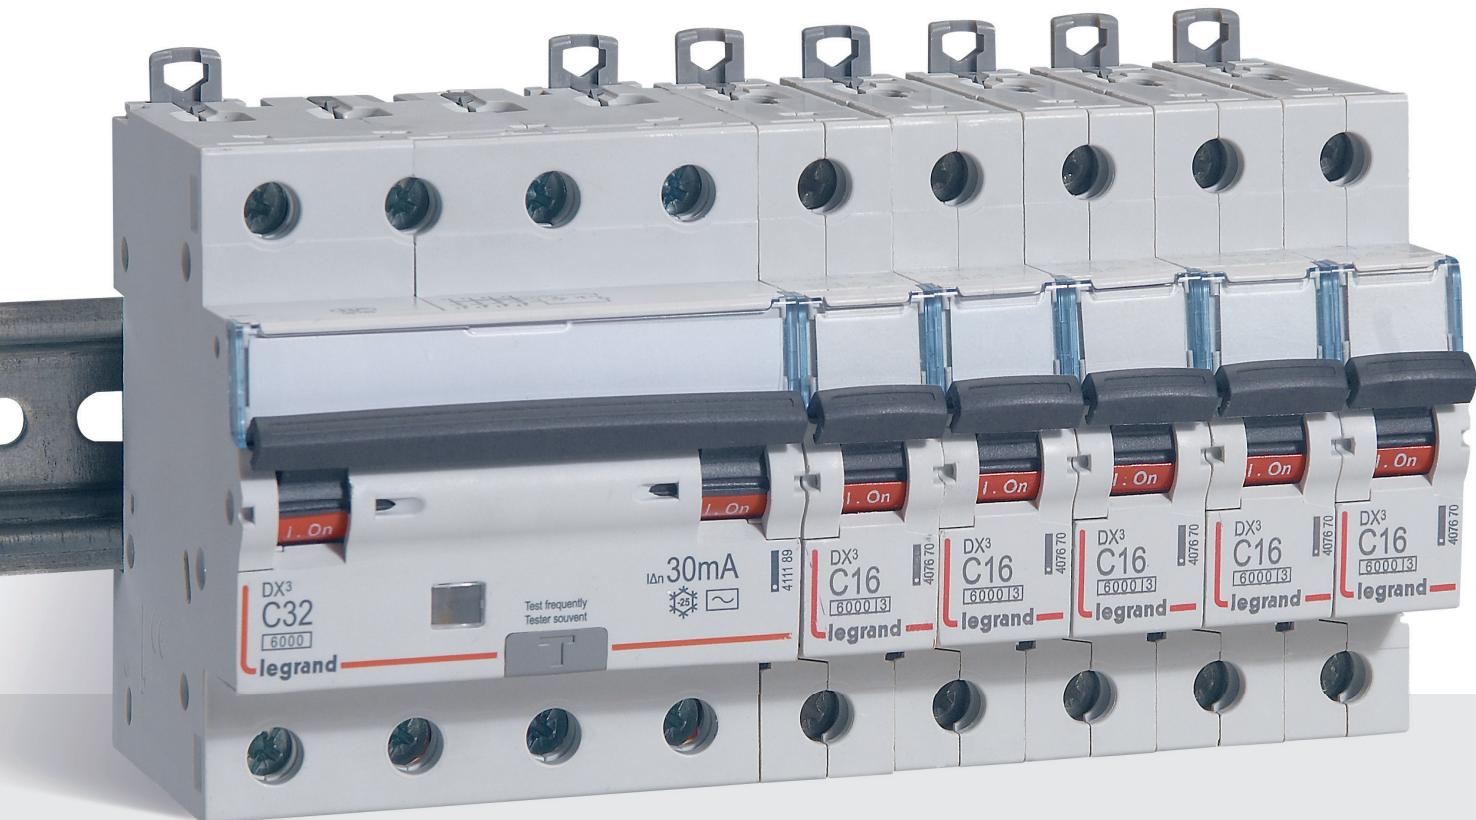

Perfect complementarity for your distribution boards up to 6 300 A and 100 kA breaking capacity.

PERFORMANCE THAT MEETS YOUR REQUIREMENTS

The DX³ range is designed to meet the efficiency, safety and compliance requirements with which new electrical installations must comply.

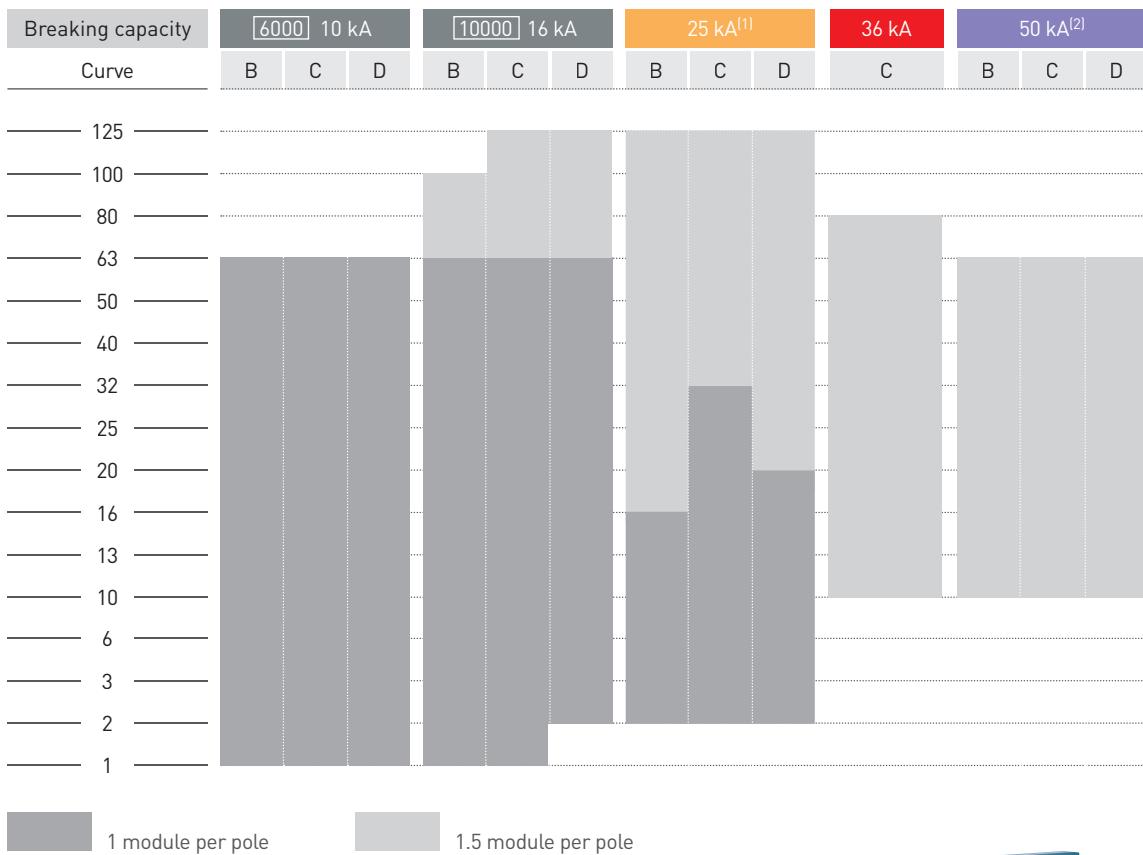

Nominal current, breaking capacity, number of poles, tripping curve, discrimination: the electrical characteristics of the new DX³ circuit breakers have been designed to meet the needs of all types of installations, from residential buildings to the largest industrial sites, including commercial buildings of all sizes.

Compact:
10 to 32 A 4-pole DX³ RCBO only 4 modules, protected neutral.

DX³ performance

A comprehensive, uniform range up to 125 A nominal current and 50 kA breaking capacity in a compact unit (1 or 1.5 modules/pole).

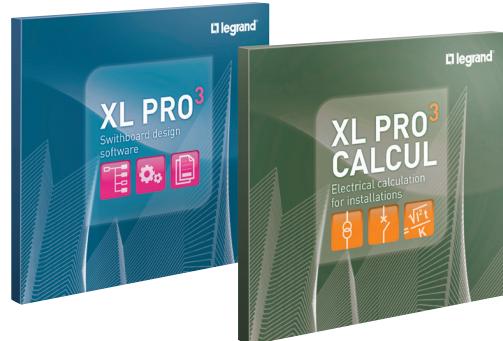

DX³ circuit breakers are limitation class 3: they limit the short-circuit power in the cables and can prolong the installation's life by avoiding damage to the cables resulting from the stresses caused by the power flowing through them. The products never work at the "limit" of their capacity.

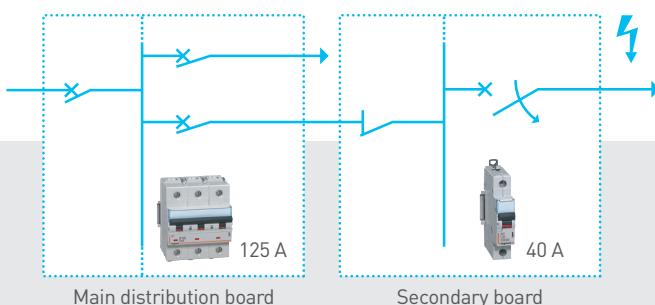

The information in the table applies to 1P, 3P and 4P circuit breakers. For further information on the number of modules per pole, please refer to the catalogue pages.

⁽¹⁾ Exists also in MA version (magnetic release only) and Z curve

⁽²⁾ Exists also in MA version (magnetic release only)

THE XL PRO CALCUL AND XL PRO³ software include the whole DX³ range for building perfect distribution boards.

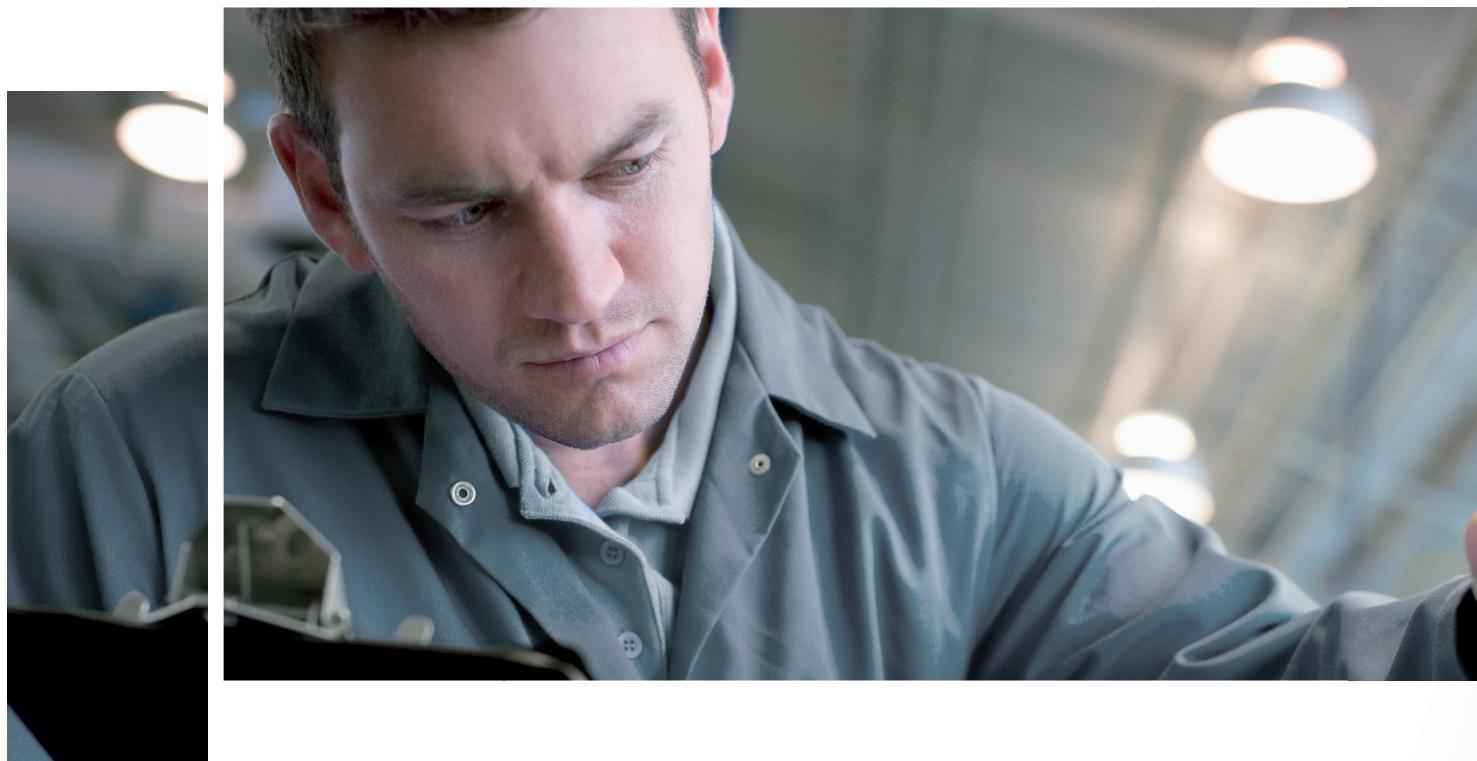

The tripping characteristics are calculated and adjusted to ensure correct discrimination between the different protection levels in order to improve ease of use.

CONTINUITY OF SERVICE: OPTIMUM DISCRIMINATION

The excellent discrimination between DX³ circuit breakers and with DPX or DPX³ MCCBs ensures optimum continuity of service for your installations.

CLEAR IDENTIFICATION OF EACH CIRCUIT

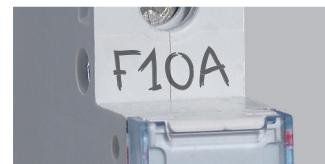

At the head of distribution boards,
at the head of rows
or to protect outgoing lines up to 125 A.
There is always a DX³ solution

Quick identification of devices and circuits is a guarantee of efficiency not only for installation but also for operation and maintenance. Legrand has always taken great care with the marking and ease of identification of its circuit breakers. The DX³ range includes new enhancements so that your distribution boards are even easier to use.

Technical labelling area

Innovative label-holder:

- Improved opening
- Enhanced dust protection
- Label remains firmly in place during transport

Identification

Dual identification of the breaking capacity and clear marking for easier maintenance

Black handle: circuit breakers
Grey handle: switches

Colour marking for the breaking capacity

25 kA

36 kA

50 kA

Curve

Rating

Breaking capacity

Limitation class 3 (on concerned ratings and breaking capacities)

STATE OF THE CIRCUIT BREAKER

Can be identified quickly via the colour marking on the handle:

I-On/red

O-Off/green

DX³ IMPECCABLE QUALITY

Legrand pays particular attention to how these devices perform: each of them is set and checked individually on the production lines

Isolating switches, RCDs, circuit breakers, RCBOs, add-on modules, control and signalling auxiliaries: the guarantee of finding the function you need with a uniform appearance and optimised dimensions.

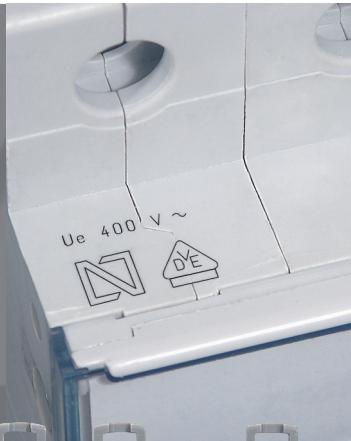

CERTIFICATION OF LEGRAND'S FACTORIES:

- ISO 9001 for quality
- ISO 14001 for environmental protection

**DX³ PRODUCTS
ARE CERTIFIED IN
ACCORDANCE WITH
INTERNATIONAL
PRODUCT
STANDARDS.**

Approvals, such as VDE, which are universally recognised for the rigour of their requirements, are renewed annually.

All DX³ circuit breakers can be used with an add-on module (see page 10).

The DX³ control and signalling auxiliaries are common to all the protection devices irrespective of their size (1 or 1.5 modules per pole) (see page 12).

COPYTRACER, THE FIGHT AGAINST COUNTERFEITING

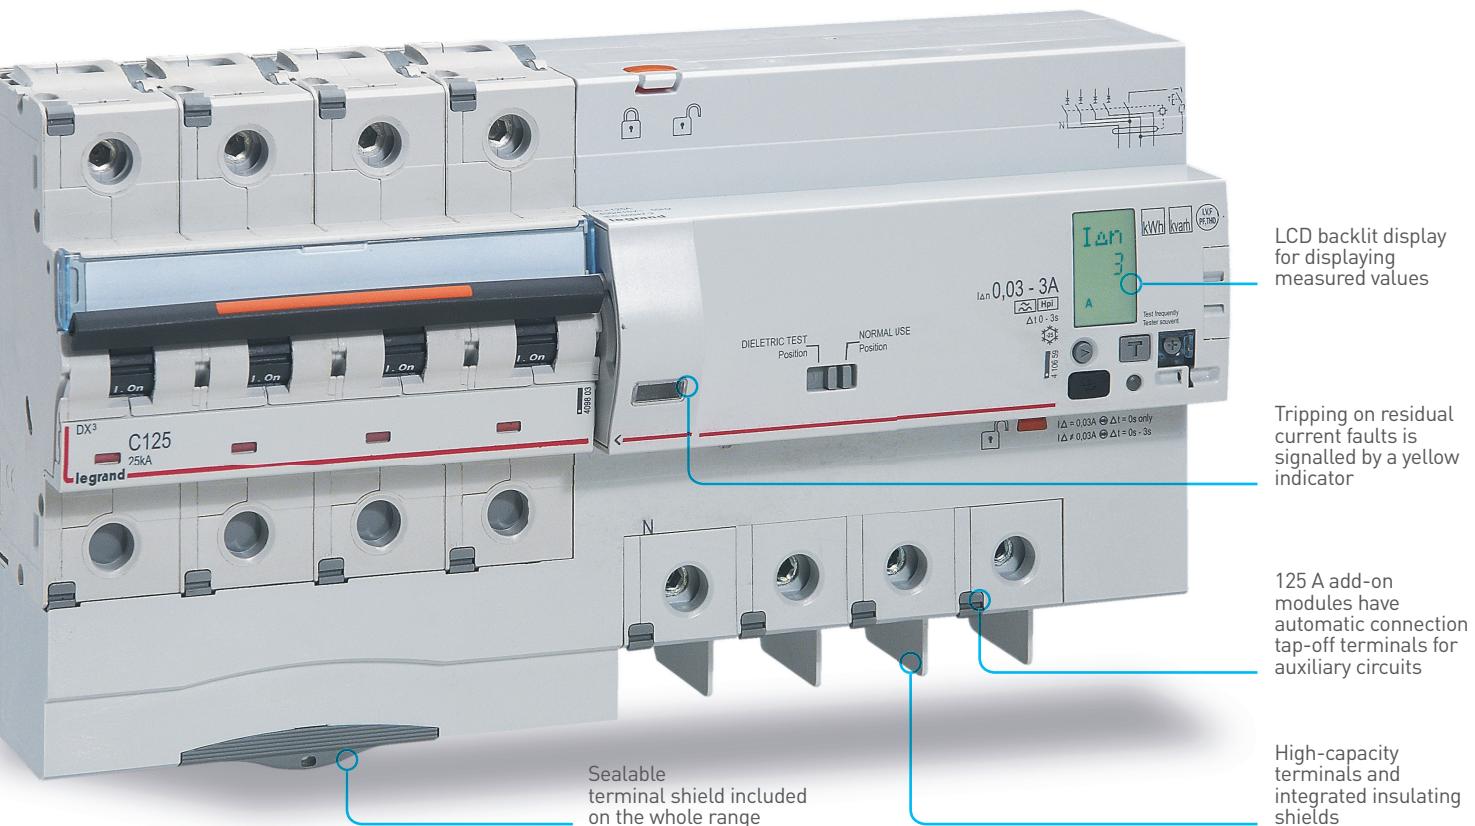

Copytracer is a unique registration number that is marked on some of our products. The number is stored in a database.

Go to the website: www.legrand-copytracer.com

PROTECTION TAILORED TO YOUR REQUIREMENTS

With the **DX³** add-on modules

The new DX³ add-on modules have a wide range of features to meet the most stringent requirements for the protection of people. Like the new DX³ circuit breakers, they offer high performance levels and incorporate innovative solutions for installation and operation.

A single mounting principle for all DX³ add-on modules

It has never been so quick and safe to fit an add-on module.

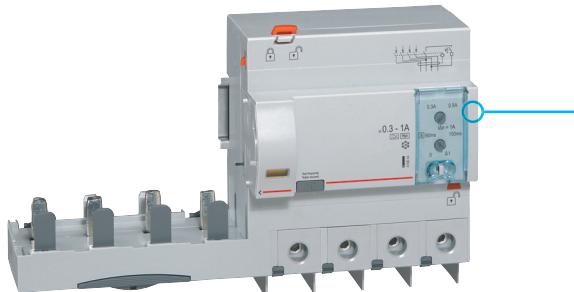

The exclusive Legrand system, common to the whole DX³ range, makes the assembly extremely strong and provides guaranteed safety.

Version	FIXED		ADJUSTABLE		WITH ENERGY METER		WITH MEASUREMENT CONTROL UNIT	
Sensitivity	30 mA		300 mA		300-500-1 000 mA		30-300-1 000-3 000 mA	
Time delay	Instantaneous		Instantaneous		0-60-150 ms		0-300 ms-1-3 s	
Max. current	63 A	125 A	63 A	125 A	63 A	125 A	63 A	125 A
AC type	4P		•		•		•	
A and type Hpi	2P	•	•		•	•		
	3P	•	•	•	•	•		
	4P	•	•	•	•	•	•	•

Maximum continuity of service

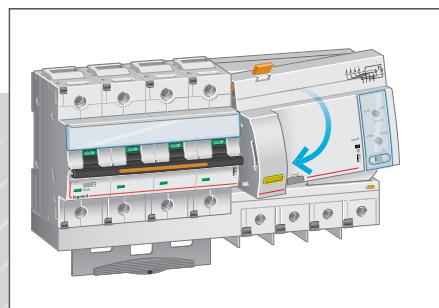

DX³ adjustable add-on modules can provide discrimination up to 3 levels by adjusting their sensitivity. They enable those parts of the installation that are not affected by a fault to remain operational, while ensuring total safety of people.

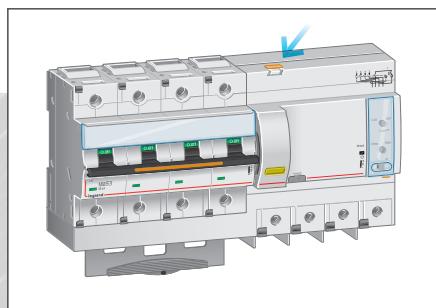

4P - 125 A ADD-ON MODULE
adjustable version

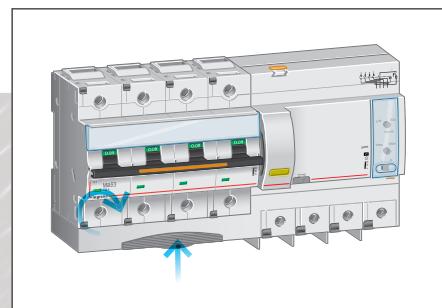

Easy to access settings on the front panel
with sealable transparent cover

FIT THE CIRCUIT BREAKER
and the add-on module

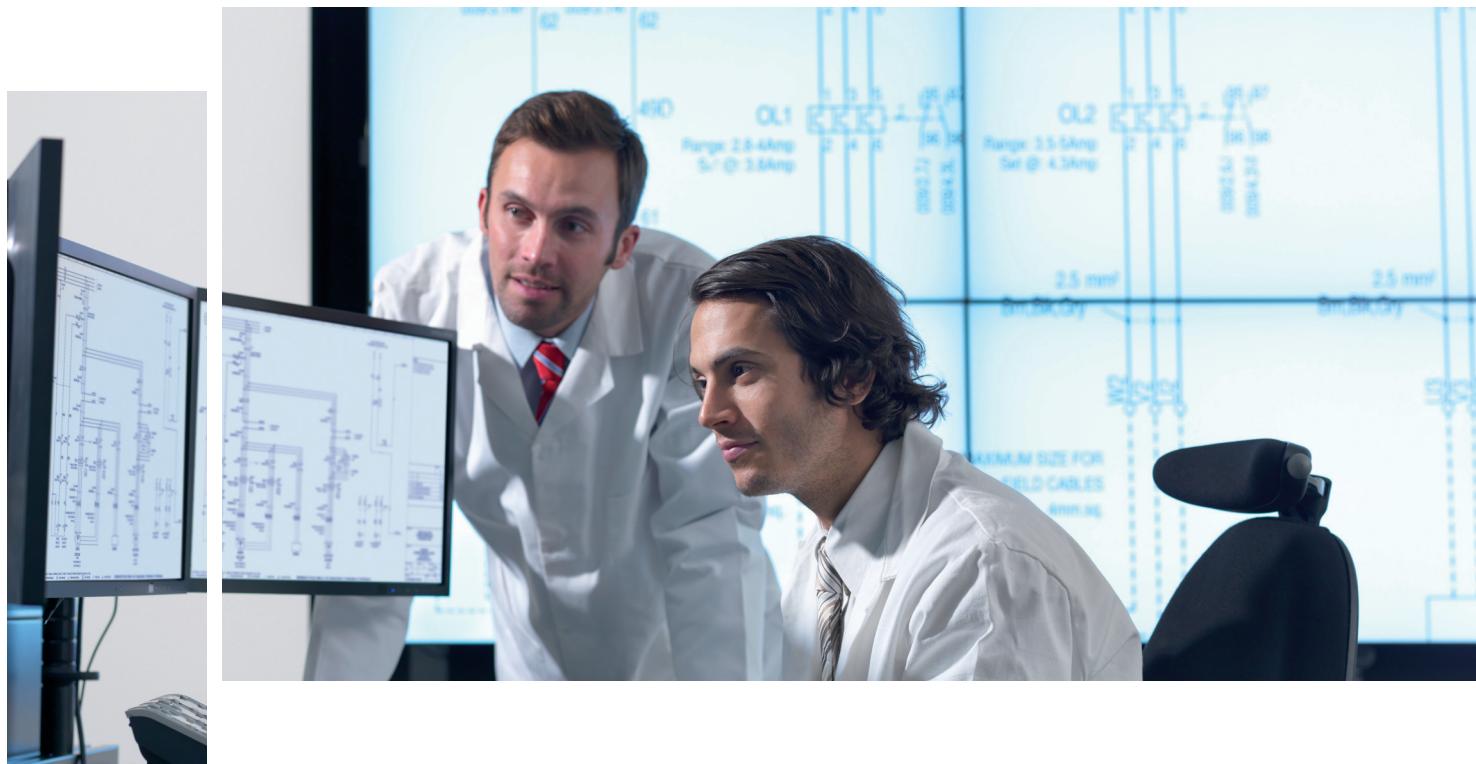

LOCK THE COMBINATION TOGETHER

TIGHTEN THE TERMINALS
and fit the terminal shield

PERFECT CONTROL OF YOUR INSTALLATION

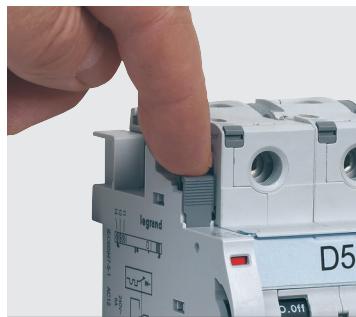

The DX³ range has a selection of electrical auxiliaries for monitoring and controlling circuits remotely

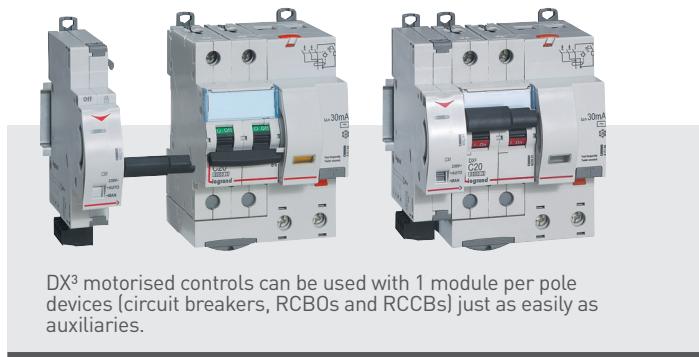

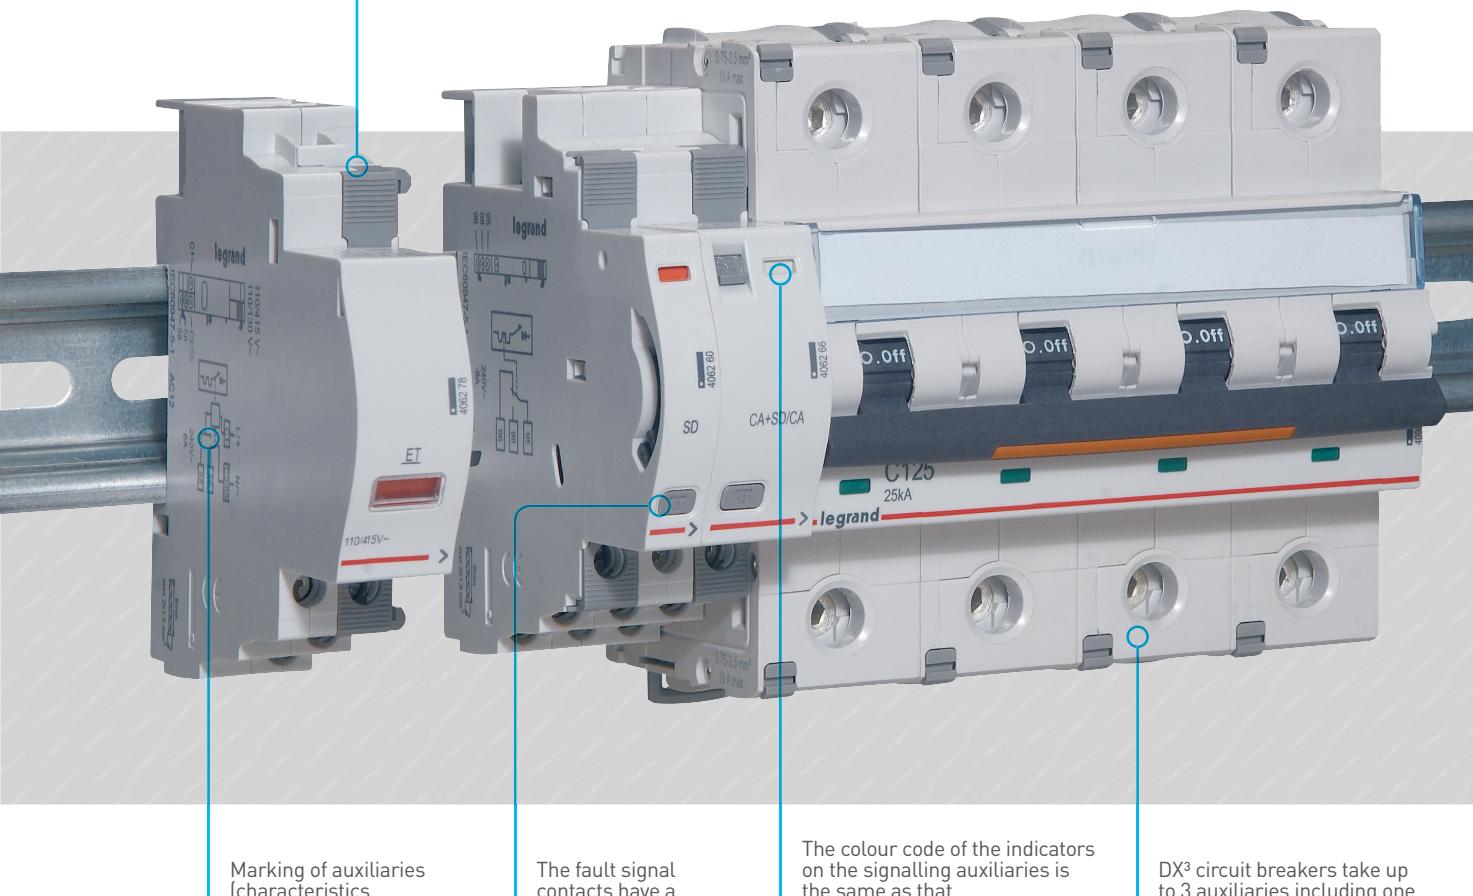

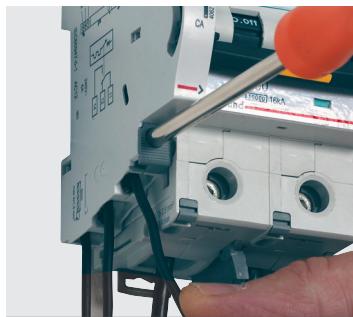

Auxiliary contacts and fault signal contacts, shunt trips, undervoltage releases, motorised controls and automatic reclosers

THE AUXILIARIES FIT FIRMLY WITHOUT the need for any tools and ensure the whole assembly is robust

THE ACCESSIBILITY OF THE TERMINALS and the visibility of the screw heads make the installer's work easier

OPTIMISED SPACE IN THE DISTRIBUTION BOARD

Legrand motorised controls are the most compact on the market: 1 module wide.

They save a great deal of space inside the distribution board.

EASY, SAFE CONNECTION

Safety is prioritised with the innovative features of the DX³ products

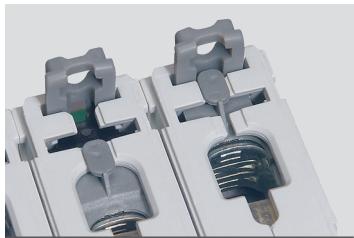

The quality and hold of the connections are vital for the safety of distribution boards. This is why Legrand, with its wealth of experience and expertise, has broken new ground again with terminals with a loosening compensation system and retractable insulating shields.

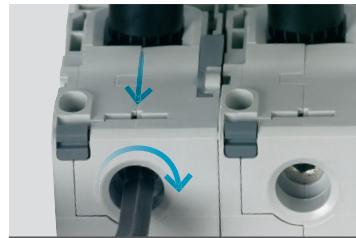

1 MODULE/POLE
Terminal capacity:
 $I_n \leq 63 A \rightarrow 50 mm^2$
 $I_n \geq 80 A \rightarrow 70 mm^2$

1,5 MODULES/POLE
Terminal capacity:
 $I_n \leq 63 A \rightarrow 50 mm^2$
 $I_n \geq 80 A \rightarrow 70 mm^2$

WIRE GUIDE FLAP ensures the wire is in the correct position

RISING CLAMP TERMINALS ensure a high quality, durable connection

RELIABLE CONNECTIONS Compensation for the effect of loosening to ensure excellent hold over time and consistent contact ($I_{n} \geq 80\text{ A}$)

1 module/pole

1,5 modules/pole

Clamping screw for flat or pozidriv screwdriver. Tightening torques higher than those recommended by the standard

The use of an Allen key makes it easier to tighten to the required torque ($I_{n} \geq 80\text{ A}$)

RETRACTABLE INSULATING SHIELDS

With the integrated retractable insulating shields, no additional accessories are needed to isolate the connections on all breaking capacities and high ratings of the 1.5 modules/pole circuit breakers.

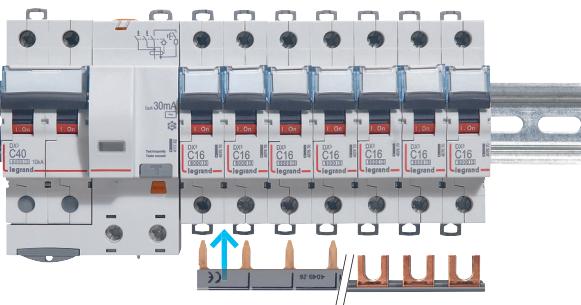

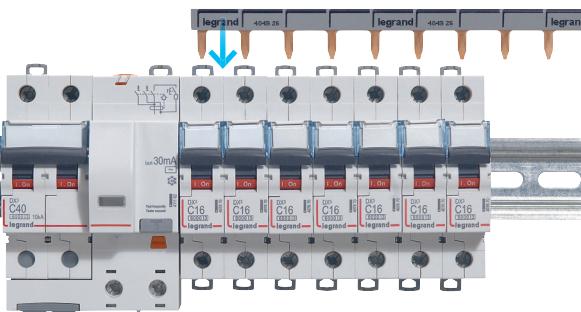

CHOOSE YOUR DISTRIBUTION

A wide range of distribution devices is available for your modular rows

From the simple supply busbar to the HX³ 125 A plug-in distribution block, whether they have conventional screw connections or more innovative automatic terminal connections, or plug in directly, Legrand quality is always there.

STANDARD DISTRIBUTION Supply busbars

DX³ 1 module/pole devices up to 63 A can be connected to supply busbars via the top or the bottom.

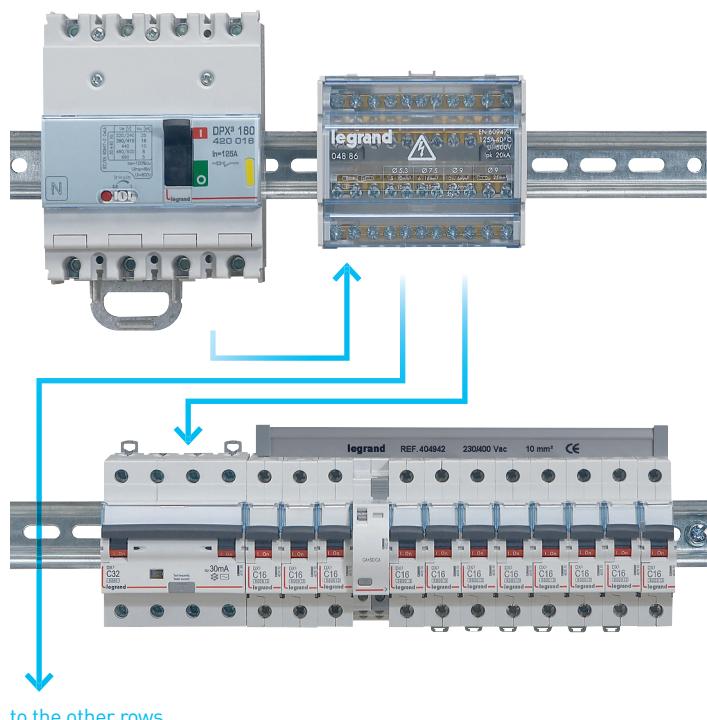

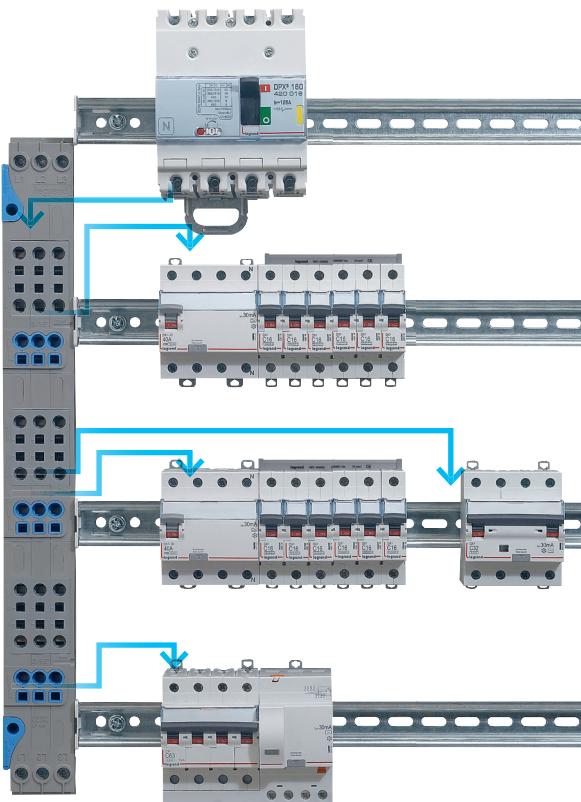

Four-pole distribution

For three-phase horizontal distribution in a single action.

STANDARD DISTRIBUTION Modular distribution blocks

The 40 to 250 A modular distribution blocks are totally universal, making them suitable for all types of distribution board.

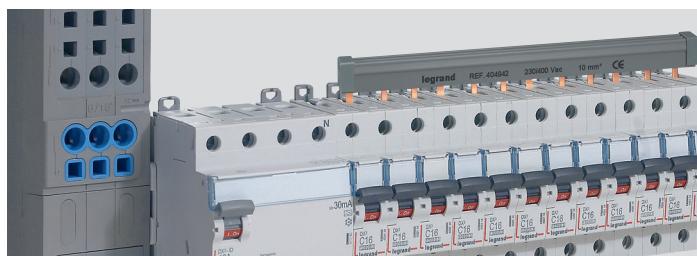

OPTIMISED DISTRIBUTION VX³ 63 and 125 A, vertical distribution blocks with automatic terminals

- Significant space saving due to their vertical installation beside the rows
- Time saving as there is less wiring with the IP 2x automatic terminals for flexible or rigid wires.

Mounting in Legrand enclosures:
Plexo³, XL³125, 160, 3 to 6 rows

SUPPLY BUSBARS, AN IDEAL ADDITION

In addition to 4-pole vertical distribution blocks with automatic terminals, supply busbars power the devices in each row via the “head of row” protection device.

CHOOSE YOUR DISTRIBUTION (continued)

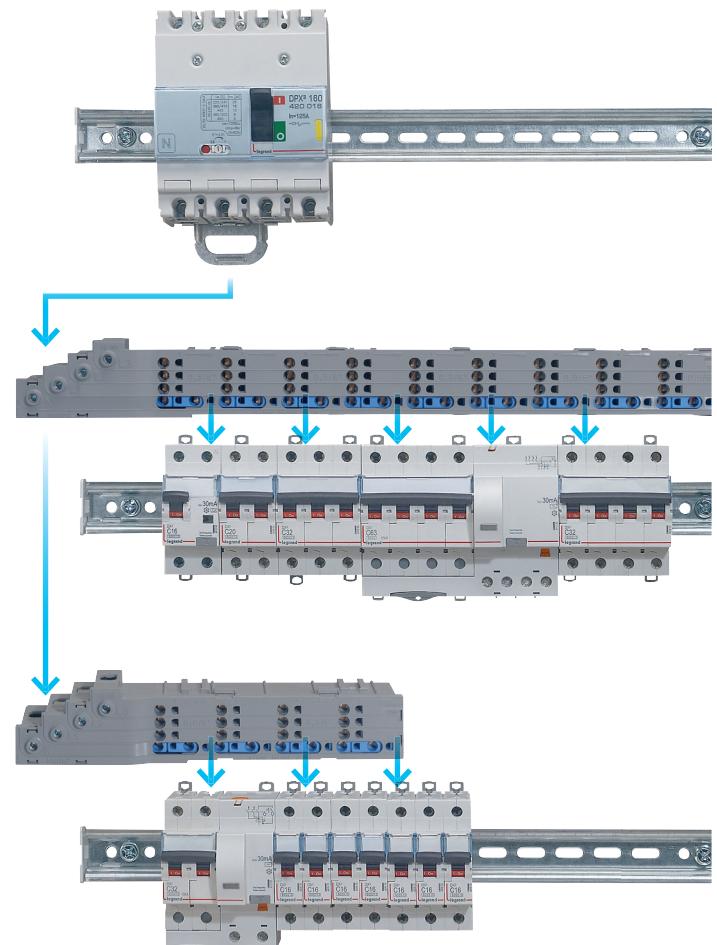

Legrand optimised distribution
has been designed for maximum safety and for ease of installation and maintenance of distribution boards

Wiring and tedious tightening operations are minimised, and the risks of poor contact and short-circuits are reduced while mounting time is optimised.

OPTIMISED DISTRIBUTION HX³ 125 A horizontal distribution blocks with automatic terminals

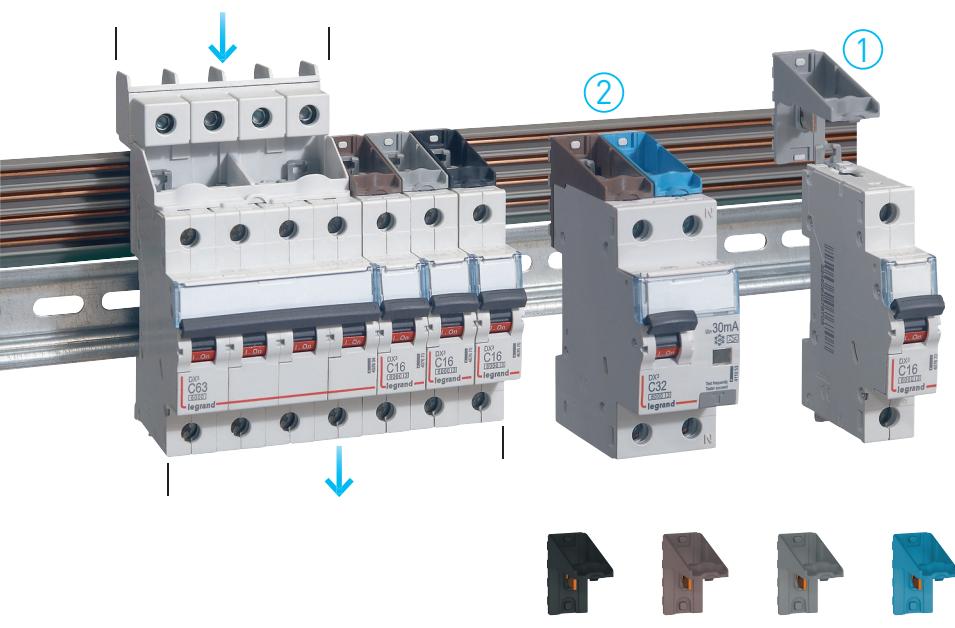

Horizontal 4-pole distribution for XL³ 160 to 4000 enclosures:

- Freedom to mix 1P, 1P+N, 2P, 3P and 4P devices on the same row
- Space saving: installed between the rows
- Time saving: less wiring, IP 2x automatic terminals for flexible or rigid wires

Fixing lugs for mounting on rails. Mounting also possible on solid plate

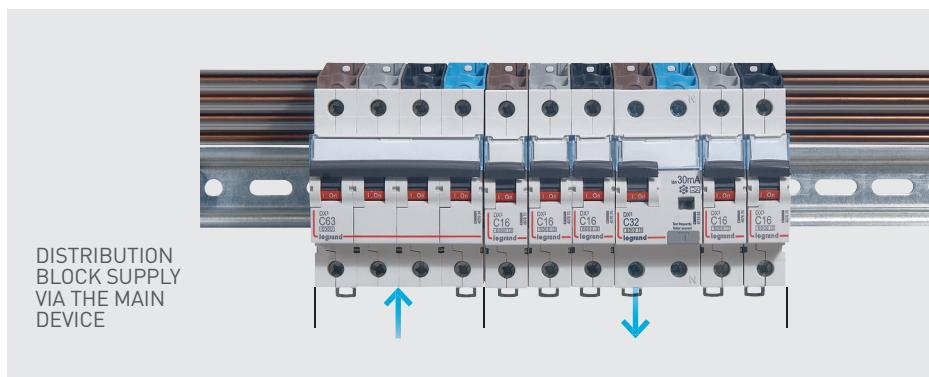

OPTIMISED DISTRIBUTION HX³ 125 A

horizontal distribution blocks with plug-in connection

Horizontal 4-pole distribution for XL³ 160 to 4000 enclosures:

- Optimised design:
freedom to mix 1P, 1P+N, 2P,
3P and 4P devices on the same row
- Optimised installation: automatic
connection with no wiring or clamping
- Safe connection and disconnection of
devices, even when the distribution
block is powered-up (due to the IP xxB
insulation of the distribution block and
the integral connection modules in
the devices).

EASY CONNECTION

Circuit breakers with plug-in terminals are fixed onto the distribution block with no need for any tool. The phase to be connected is determined by the choice of connector. The distribution block can be supplied via the power supply module provided or via the head of row device.

EASY OPERATION AND MAINTENANCE

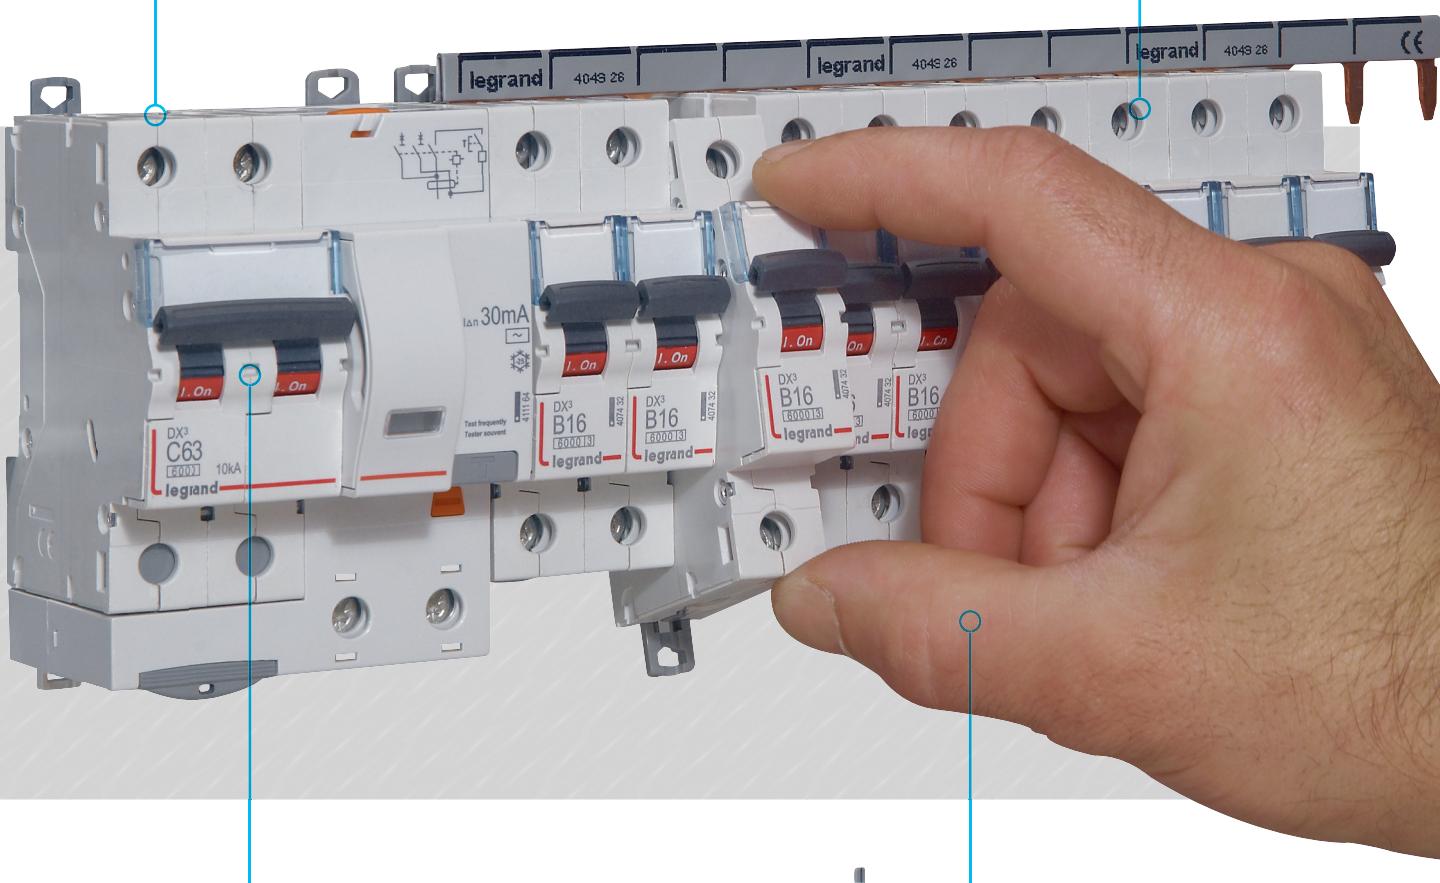

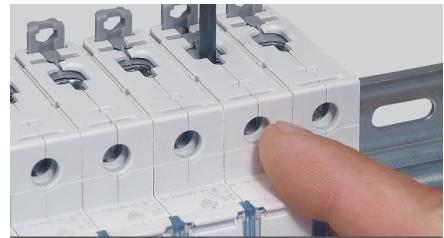

When designing
the DX³ range,
Legrand did not
forget about
users and
maintenance
engineers

As well as the already well-known functions such as the double clip which enables maintenance to be carried out on the module, new features such as the labelling area, automatic connection tap-off terminals and status indicators have been added to make day-to-day use of distribution boards even easier.

EASY TAP-OFF CONNECTION FROM 80 A
The IP 2x automatic tap-off terminals can be used to connect an auxiliary circuit or a measuring device safely

INCREASED SAFETY
The DX³ range guarantees IP2x protection. There is no risk of contact with live parts, even when the faceplate is open.

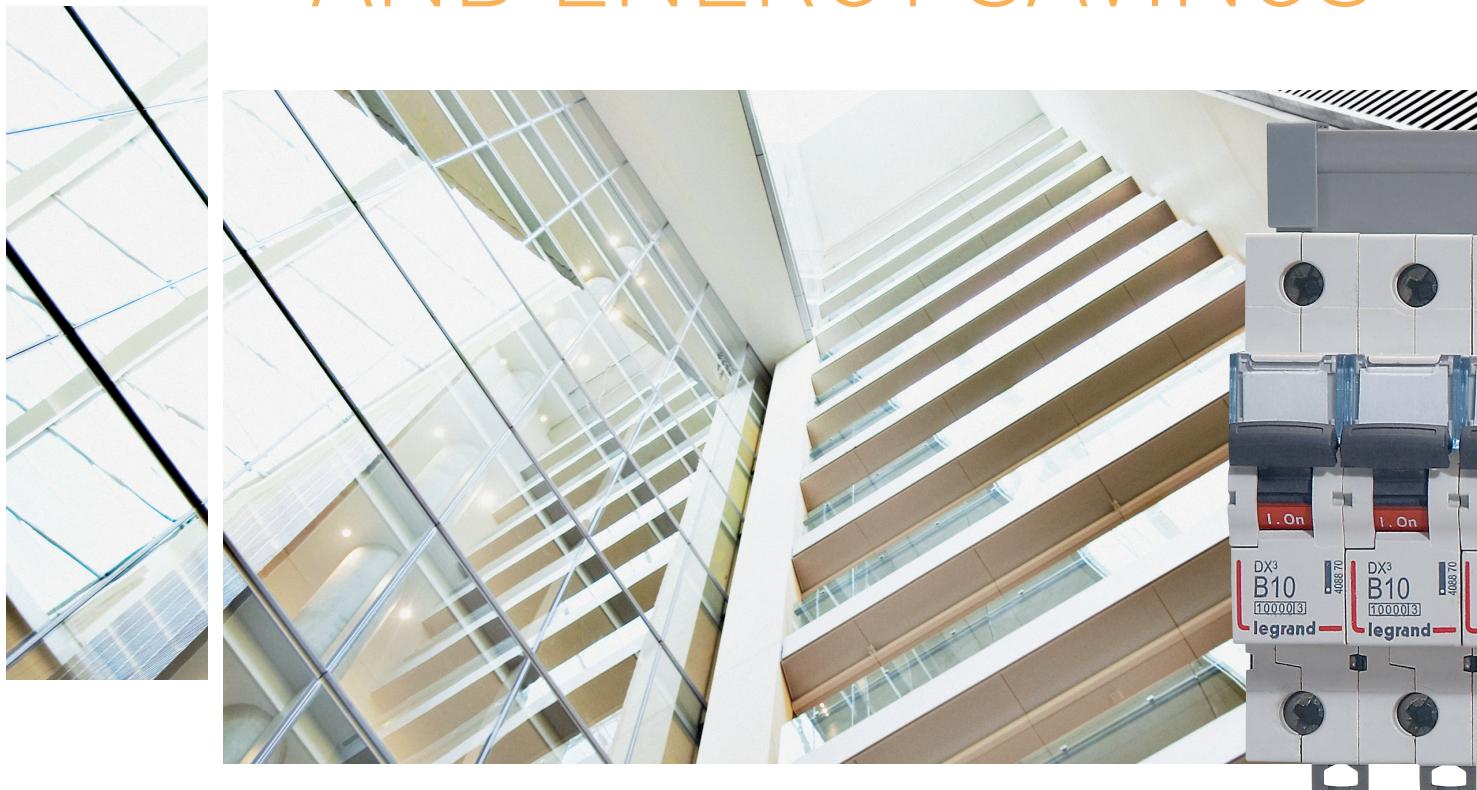

LOCKING IN OPEN POSITION
for 1.5 module per pole devices using a single Colring cable tie

THE DOUBLE CLIP
enables a device to be replaced without disconnecting the whole row

MORE COMFORTABLE BUILDINGS AND ENERGY SAVINGS

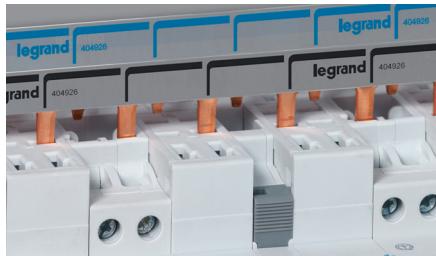

CX³ modular control and monitoring devices are a perfect addition to the range of DX³ protection devices

With the same design, they integrate perfectly in your distribution boards. Power contactors, pulse operated latching relays, pushbuttons, indicators, timers, programmers, etc. With the selection of functions available it is simple to improve the safety, efficiency and comfort of installations and meet energy requirements.

CHANGEOVER SWITCHES AND PUSH-BUTTONS compatible with fluorescent lamps (20 AX)

INDICATORS AND ILLUMINATED PUSH-BUTTONS equipped with long life LED lamps for common use or specially adapted for ELV circuits and DC applications

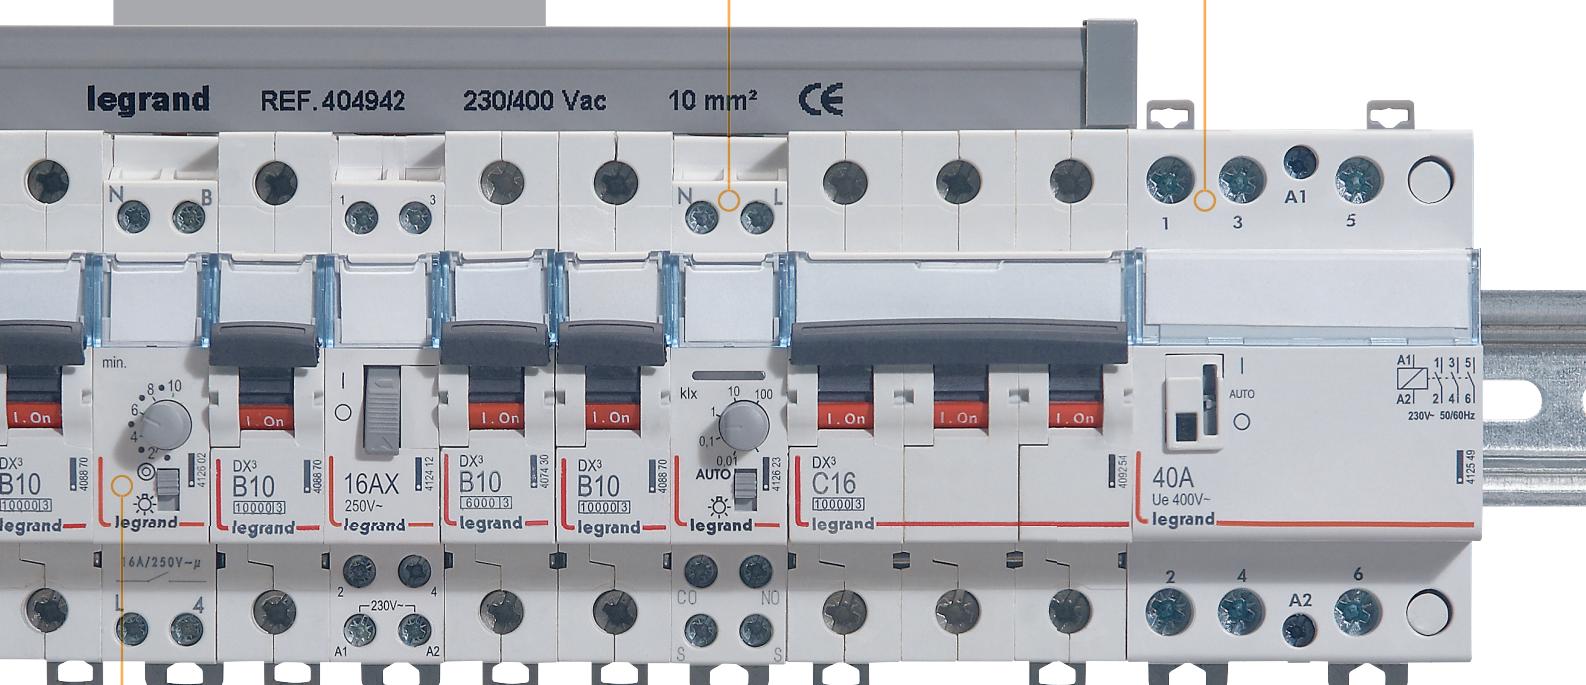

SUPPLY BUSBAR INSERTION

There is a position on the top of the control devices for inserting the supply busbar

LIGHT SENSITIVE SWITCH
to switch lighting on automatically when the natural light decreases

16 A TO 63 A LEGRAND POWER CONTACTORS are available with 24 VAC or 230 VAC coil

TIMER

to switch off of lighting automatically after an adjustable period of 0.5 s to 10 min

- 1 to 4 x 16 A outputs
- 24-hour, 7-day or annual programming
- Programming direct or from a PC with a transfer key

ENERGY SAVINGS WITH TIMERS

In order to optimise power consumption, Legrand electronic timers can be used to assign operating periods, for example for heating or lighting.

MEASUREMENT AT THE HEART OF ENERGY EFFICIENCY

A project to optimise
quality and 
energy efficiency must
include measurement

Measurement upstream, to identify the critical points and ensure optimum targeting of the actions to be taken. Downstream to monitor the effects and control any drift. Legrand EMDX³ measurement control units and electricity meters will naturally have a place in distribution boards.

EMDX³ measurement control units

All the essential parameters of the installation on DIN rail or on the door:

- Dual tariff metering
- Active and reactive energy
- Operating time
- Power factor
- Harmonic distortion
- Programmable alarms

EMDX³ UNIT ON DIN RAIL

EMDX³ UNIT ON DOOR
EMDX³ units on doors provide a large size display and their capacity can be increased with extension modules.

ECO-DESIGN A VOLUNTARY APPROACH

The Legrand group has been taking environmental problems into account since 2001. This approach is based on international standards for the objective measurement of the environmental impacts of products in terms of both consumption of resources and pollution. Legrand publishes these reports in the form of PEP (Product Environmental Profile) sheets.

Remote supervision and viewing

With the Legrand communication interfaces (RS 485, IP), supervision software and Web servers, measurements can be centralised and displayed remotely on a PC, tablet or smartphone.

Integrated measurement: choosing a more compact solution

Integrated measurement is available on the DMX³, DPX³ and DX³ ranges. The panel board display is an innovative solution, allowing to integrate information coming from 8 different devices DX³, DPX³, DMX³ or EMDX³ control units.

RCCBs DX³-ID

technical characteristics

DX³-ID - RCCBs (residual current circuit breakers)

Connection cross-section

RCCBs	Cable (mm ²)	
	Rigid	Flexible
Connection at top and bottom	50	35

AC type - Standard applications

AC type RCCBs detect sinusoidal AC residual currents
 In the majority of cases (standard applications), they are used for AC current detection at 50 Hz

A type - Specific applications: dedicated lines

In addition to the characteristics of AC type RCCBs, A type RCCBs also detect pulsating DC residual currents
 They are used whenever fault currents are not sinusoidal
 They are particularly suitable for the following specific applications: hobs, washing machines or materials that may produce DC fault currents, speed drives with frequency inverters, etc.

G type - Same applications like A type

Meet the requirements of ÖVE/ÖNORM E 8601 standard

B type - Specific applications: dedicated lines

In addition to the characteristics of A type RCCBs, B type RCCBs also detect smooth DC residual currents
 They are used whenever fault currents are not sinusoidal
 They are particularly suitable for the following specific applications : speed drives and inverters for supplying motors for pumps, lifts, textile machines, machine tools, photovoltaic installations, call centres, medical equipment, etc.

Hpi type - Special applications

Type Hpi RCCBs are devices which offer additional immunity to unwanted tripping which significantly exceeds the level required by the standard
 They are also able to detect AC and DC residual currents (A type)
 Operation between - 25 °C and + 40 °C
 They are used in special applications where:

- Loss of information is potentially damaging, e.g. power supply lines for computer equipment (banks, equipment on military bases, flight reservation centres, etc.)
- Loss of operation is potentially damaging (automated machinery, medical equipment, freezer cable, etc.)

 They are also used:

- On sites where there is an increased risk of lightning strikes
- On sites where cables are subject to high levels of interference (use of fluorescents, etc.)
- On sites where very long cables are used
- For spaces with chlorinated swimming pool-type atmosphere

RCBOs DX™ 10000

residual current circuit breakers from 10 A to 45 A - AC type

6 064 15

Technical characteristics **see e-catalogue**

Breaking capacity:

10000 - IEC 61009-1

- AC type : detect AC component faults

Pack	Cat.Nos	Single pole - 230 V~

**MANUAL SUPPLY INVERTORS,
FRONT EXTERNAL HANDLES**

Discover the products

Thanks to the new manual supply invertors you can improve the continuity of service of your installation. The front external rotary handles allow a better control of the modular devices without opening the door of the enclosure.

Manual supply inverter p. 45

**MANUAL SUPPLY
INVERTOR (MSI)**
For 2P, 3P and 4P
DX³ and MCBs and remote trip isolating switches
For manually switching between mains and an alternative power supply

Front external rotary handle p. 45

EXTERNAL HANDLE
For all DX³, TX³ and RX³ devices from 2P upwards. Allow the manual control of the modular devices without opening the enclosure
Available in two versions : with black or yellow & red handle

Other products:
DX³ add-on modules with integrated measuring unit **p. 43**

Installation principle
see e-catalogue

RCBOs DX³ **6000** - 6 kA - residual current circuit

breakers from 2 A to 40 A - AC, A and Hpi types

4 110 13

Technical characteristics [see e-catalogue](#)

Conform to IEC 61009-1

Breaking capacity:

[6000] - IEC 61009-1 - 6 kA / IEC 60947

- AC type
- A type
- Hpi type (High immunity)

Enhanced immunity to unwanted tripping in disturbed environments
Can be equipped with DX³ signalling and remote tripping auxiliaries and motorised controls (p. 44-45)

MCBs DX³ 10000 - 16 kA

thermal magnetic MCBs from 0.5 A to 125 A - B and C curves

4 088 69

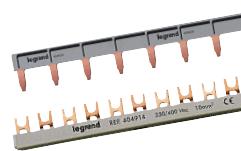

4 089 43

4 088 90

4 093 64

Technical characteristics [see e-catalogue](#)

Conform to IEC 60898-1

Compatible with both prong-type and fork type supply busbars (except 80 A, 100 A and 125 A MCBs)

Breaking capacity:

10000 - IEC 60898-1 - 400 V~

16 kA - IEC 60947-2 - 400 V~

Can be equipped with DX³ signalling and remote tripping auxiliaries, motorised controls (p. 44-45) and add-on modules (p. 42-43)

MCBs DX³ - 16 kA - direct current

thermal magnetic MCBs from 0.5 A to 63 A

4 095 69

4 095 69

Technical characteristics [see e-catalogue](#)

Operating voltage from 12 V_{dc} to 500 V_{dc}

Breaking capacity:

16 kA - IEC 60947-2 - 230 V_{dc}

10 kA - IEC 60947-2 - 440 V_{dc}

6 kA - IEC 60947-2 - 500 V_{dc}

Magnetic threshold from 5 to 7 In

Can be equipped with DX³ signalling and remote tripping auxiliaries and motorised controls (p. 44-45)

Direct current circuit breakers

Add-on modules DX³

Compatibility MCBs/add-on modules

Breaking capacity	Curve	Number of poles	Add-on module for 1 module/pole MCBS	Add-on module for 1.5 module/pole MCBS
6000 / 10 kA	B, C, D	2P, 3P, 4P	All range	-
10000 / 16 kA	B, C, D	2P, 3P, 4P	In ≤ 63 A	In ≥ 80 A
	B, C, Z	3P, 4P	In ≤ 25 A	In ≥ 32 A
		2P	In ≤ 32 A	In ≥ 40 A
	D	3P, 4P	In ≤ 10 A	In ≥ 12,5 A
25 kA		2P	In ≤ 25 A	In ≥ 32 A
50 kA	B, C, D	2P, 3P, 4P	-	All range

Adjustable add-on modules, Hpi type

Easy to access settings on front panel with sealable transparent cover
Sensitivity: 300, 500 and 1000 mA
Time delay: instantaneous, selective (60 ms) or delayed (150 ms)

Hpi add-on modules with integrated metering unit or measurement control unit

Conform to standards EN 61009-1, EN 60947-2 and 61557-12 (PMD/DD/K55)

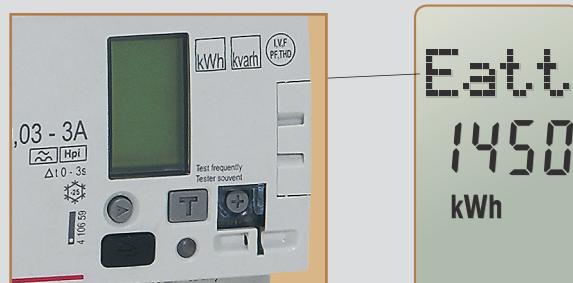

Electronic settings on the front panel

Sensitivity: 30, 300, 1000, 3000 mA

Time delay: instantaneous, or delayed (300 ms, 1 s, 3 s)

For integration in the EDMX³ display and supervision system with interface Cat.No 4 210 75 (p. 85), to feed back information and the status of the remote MCB.

Precision: EN 61557-12 Class 1

For detailed dimensions, [see e-catalogue](#)

Signalling and remote tripping auxiliaries DX³

Pack	Cat.Nos	Signalling auxiliaries prong busbar adapted	Pack	Cat.Nos	Remote tripping auxiliaries
		To fit on the left-hand side of DX ³ and TX ³ devices Maximum number of auxiliaries per device: - 3 signalling auxiliaries or - 2 signalling auxiliaries + 1 remote tripping auxiliary Allow insertion of the supply busbar, top side No tool required for joining together the auxiliary and the main device.			To fit on the left-hand side of DX ³ and TX ³ devices Maximum 1 remote tripping auxiliary per device Allow insertion of the supply busbar No tool required for joining together the auxiliary and the main device. For MCBs, RCBOs, RCCBs and remote trip isolating switches
1	4 062 58	Auxiliary contact 6 A - 250 V~ (changeover switch) For MCBs, RCBOs, RCCBs, isolating switches or remote trip isolating switches Indicates the position of the contacts of its associated device.			Current shunt trips For remote tripping of its associated device via a N/O push button 12 to 48 V~/=
1	4 062 60	Fault signalling contact 6 A - 250 V~ (changeover switch) For MCBs, RCBOs, RCCBs, Indicates the fault tripping of its associated device	1	4 062 76	110 to 415 V~
1	4 062 62	Auxiliary or fault signalling contact 6 A - 250 V~ (changeover switch) For MCBs, RCBOs, RCCBs Allows the choice between the two functions	1	4 062 80	Undervoltage releases For remote tripping of its associated device in case of mains voltage drop down or with the help of a N/C push button 24 to 48 V~/=
1	4 062 66	Auxiliary + fault signalling contact or auxiliary contact + auxiliary contact 6 A - 250 V~ (changeover switch) For MCBs, RCBOs, RCCBs	1	4 062 82	230 V~
			1	4 062 86	Power overvoltage protection (POP) Protects the circuit by tripping its associated device in case of overvoltage between phase and neutral. Tripping threshold: 275 V (eg. in case of neutral failure)
			1	4 062 87	Autonomous shunt trip for N/C push-button 230 V~ For remote tripping with positive security on a control circuit via a N/C push-button or emergency stop. Does not trigger its associated device in case of mains power failure (the trigger occurs only after a deliberate action of a N/C push-button). Supplied with battery Minimum working reserve: 60 hours (for remote tripping even if there is no supply voltage) Spare battery for autonomous shunt trip Cat.No 4 062 87
		Signalling auxiliaries fork busbar adapted			
		To fit on the left-hand side of DX ³ and TX ³ devices Maximum number of auxiliaries per device: - 3 signalling auxiliaries or - 2 signalling auxiliaries + 1 remote tripping auxiliary Allow insertion of supply busbar, bottom side No tool required for joining together the auxiliary and the main device.			
1	4 062 50	Auxiliary contact 6 A - 250 V~(changeover switch) For MCBs, RCBOs, RCCBs, isolating switch or remote trip isolating switch Indicates the position of the contacts of its associated device			
1	4 062 59	Fault signalling contact 6 A - 250 V~(changeover switch) For DX ³ -ID B type RCCBs (p. 29)			
1	4 062 52	Auxiliary or fault signalling contact 6 A - 250 V~ (changeover switch) For MCBs, RCBOs, RCCBs, Indicates the fault tripping of its associated device			
1	4 062 56	Auxiliary + fault signalling contact or auxiliary contact + auxiliary contact 6 A - 250 V~ (changeover switch) For MCB, RCBOs, RCCBs			
1	4 062 64	Allows the choice between the two functions			

Motorised controls DX³, STOP&GO automatic resetting

4 062 91

4 062 92

4 062 88

Manual supply inverter DX³ and accessories

4 063 14

4 063 19

Pack	Cat.Nos	Motorised controls	
		For remote control (opening and closing) of their associated device. To fit on the left-hand side of DX ³ and TX ³ devices For MCBs, RCBOs, RCCBs and remote trip isolating switches (from 1P to 4P) Can take one control auxiliary and one signalling auxiliary. No tool required for joining together the motorised control and the main device	
		ON/OFF function - for 1 module / pole devices (In up to 63 A)	
1	4 062 90	Control voltage 24-48 V~/=	Number of modules 1
1	4 062 91	230 V~	1
		ON/OFF function - for 1.5 module / pole devices (In up to 125 A)	
1	4 062 92	230 V~	1
		ON/OFF + automatic resetting function - for 1 module / pole devices (In up to 63 A)	
1	4 062 93	Automatically resets the device to which it is associated, thus ensuring continuity of service 24-48 V~/=	2
1	4 062 95	230 V~	2
		STOP&GO automatic resetting	
		For automatic resetting of 1 module per pole RCCBs and RCBOs up to 63 A STOP&GO is used in the event of unwanted tripping generated by temporarily electrical disturbances or other external events. Can take one control auxiliary and one signalling auxiliary. The signalling auxiliary must be placed between the STOP&GO and the control auxiliary. No tool required for assembling	
		Automatic resetting function	
1	4 062 88	Control voltage 230 V~	No. of modules 2
1	4 062 89	230 V~	2
		Automatic resetting + periodic self-test function	

Pack	Cat.Nos	Manual supply inverter (MSI)	
		For manually switching between the mains and an alternative power supply. Allow to restore power on pre-designated and/or critical circuits in case of a power failure of the main supply. For DX ³ MCBs and remote trip isolating switches Installation principle - see e-catalogue	
1	4 063 14	For 2P 2-module devices	
1	4 063 15	For 3P 3-module devices	
1	4 063 16	For 4P 4-module devices	
		Front external rotary handles	
1	4 063 19	Allow the manual control (open/close) of a modular device without opening the enclosure For all DX ³ devices from 2P upwards Black handle	
1	4 063 20	Yellow and red handle	
		Wiring management accessories	
		Insulating shields	
1	4 063 05	For 1 module per pole MCBs For separation between the terminals of the MCB, when using high cross section cables	
10	4 063 07	Spacing unit with feedthrough 0.5 module Allows cables to run between two modular devices and creates an air channel in order to limit temperature rise	
1	4 063 10	Terminals for aluminium cables For 1.5 module/pole MCBs up to 63 A For 1.5 module/pole MCBs and remote trip isolating switches from 80 A to 125 A	
1	4 063 11		
		Safety and maintenance accessories	
		Sealable screw covers	
2	4 063 04	For 1 module per pole MCBs (set of 4)	
1	4 063 12	For 1.5 module per pole MCBs (set of 4)	
		Terminal shield	
1	4 063 06	For 1.5 module/pole MCBs (set of 2)	
		Padlocking	
1	0 227 97	To lock the handle of a modular device during maintenance Large padlock, Ø6 mm, 50 mm length Supplied with two keys and labels	
3	4 063 13	Small padlock, Ø5 mm	
2	4 063 03	Support for one padlock (for small or large model) For locking the handle of the modular devices (MCBs, RCCBs, RCBOs or isolating switches) in OFF position

Performance of add-on modules

AC type - Standard applications

Detection of 50-60 Hz AC residual currents

A type - Specific applications: dedicated lines

In addition to the characteristics of AC type add-on modules, A type add-on modules also detect residual currents with DC components. They are used whenever the fault currents are not sinusoidal. They are particularly suitable for the following dedicated line applications:

- On circuits where class 1 equipment may produce fault currents with DC components, such as variable speed drives with frequency inverter, etc.

Hpi type - Special applications

Hpi add-on modules, with additional immunity to false tripping, which is much higher than the level required by the standard, detect residual currents with AC and DC components (A type), operate between - 25°C and + 40°C, and are used in the following special cases:

- When loss of data would be detrimental, such as computer equipment power supply lines (banks, military instrumentation, airline reservation centres, etc.)

- When loss of operation would be detrimental (automated machines, medical instrumentation, freezer lines, etc.)
- In places where there is a high risk of lightning strikes

- On sites with lines subject to considerable interference (use of fluorescent lights, etc)
- On sites with very long lines

Special case of continuity of service

In certain locations where no staff are present and in which continuity of service is particularly important, false tripping of MCBs is not permitted (isolated telephone/TV or radio substations, pumping stations, etc.)

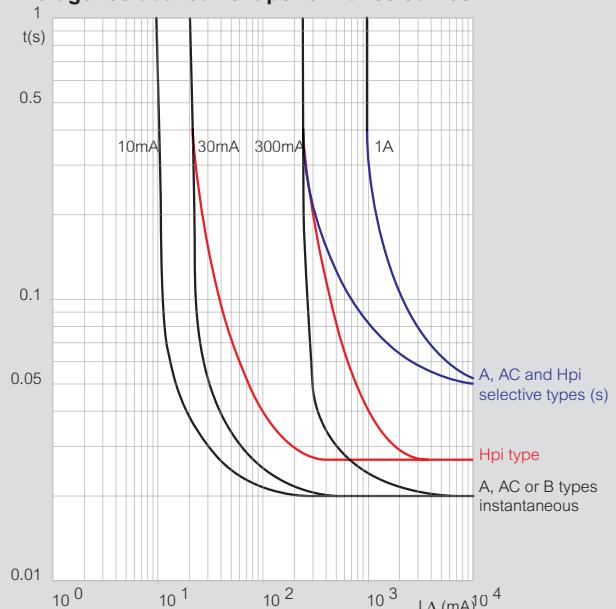

Combining an Hpi RCBO with a motorised control and a STOP & GO recloser provides optimum continuity of service

B type

In addition to the characteristics of A type RCDs, B type RCDs also detect smooth DC residual currents

They are used whenever fault currents are not sinusoidal. They are particularly suitable for the following specific applications : speed drives and inverters for supplying motors for pumps, lifts, textile machines, machine tools, photovoltaic installations, call centres, medical equipment, etc.

Average residual current performance curves

Residual current breaking capacity of DX³ add-on modules

back-up tables¹ (in kA)

■ Breaking capacity (enhanced by cascading) in three-phase networks (+N) 400/415 V according to IEC 60947-2 (kA)

Back-up protection allows to increase the breaking capacity of a circuit breaker by coordinating it with another protection device, placed upstream. This coordination makes it possible to use a protection device with a breaking capacity which is lower than the maximum prospective short-circuit current at its installation point⁽¹⁾.

For columns applicable to several circuit breakers with different breaking capacities, selectivity never exceeds upstream MCB breaking capacity. If this value is superior, use upstream MCB breaking capacity value.

Example : DPX³ 250 (36 kA) 160 A upstream, and DX³ 50 kA D curve downstream. Use 36 kA value, and not 50 kA value as the T (total selectivity) indicated in the table. T (total selectivity) is applicable with the DPX³ 250 (70 kA) upstream, unless the DPX³ is associated with another upstream device.

Note : In accordance with its policy of continuous improvement the Company reserves the right to change values without notice.

Protection of DC circuits

■ Protection of DC circuits

DX³ 6000 and DX³ 10000 MCBs (1P/2P/3P/4P - In ≤ 63 A) designed for use in 230/400 V_~ supplies, can also be used in DC circuits. In this case, the following deratings and precautions must be taken into account

1 - Protection against short-circuits

Max. magnetic tripping threshold: multiplied by 1.4

Example: For a C curve MCB for which the AC tripping threshold is between 5 and 10 In, the DC tripping threshold will be between 7 and 14 In

2 - Protection against overloads

The time/current thermal tripping curve is the same as for AC

3 - Operating voltage

Max. operating voltage: 80 V per pole (60 V for single-pole + N MCBs). For voltages higher than this value, several poles must be wired in series

Example: for a 110 V voltage, use a 2-pole MCB and connect the 2 poles in series

4 - Breaking capacity

4000 A for a single pole MCB at max. voltage (80 V_{dc} per pole)

For other voltages, the breaking capacities are as follows:

DX ³ 6000		voltage	single-pole	2P	3P	4P
Acc. to IEC 60947.2	Icu	≤ 48 V	6 kA	6 kA		
		110 V		6 kA	6 kA	
		230 V				10 kA
	Ics ⁽¹⁾	≤ 48 V	100 %	100 %		
		110 V		100 %	100 %	
		230 V				100 %

DX ³ 10000		voltage	single-pole	2P	3P	4P
Acc. to IEC 60947.2	Icu	≤ 48 V	10 kA	10 kA		
		110 V		10 kA	10 kA	
		230 V				16 kA
	Ics ⁽¹⁾	≤ 48 V	100 %	100 %		
		110 V		100 %	100 %	
		230 V				100 %

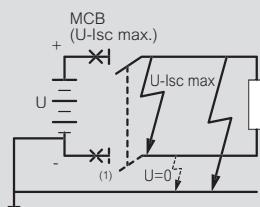

1: As a % of Icu

5 - Distribution of breaking poles

To choose the MCB and determine the pole distribution necessary for breaking on each of the polarities, it is necessary to know how the installation is earthed.

• Supply with one polarity earthed:

Place all the poles necessary for breaking on the other polarity. If isolation is required, an additional pole must be added on the earthed polarity

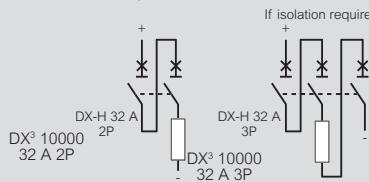

1: Only if isolation required

Example: circuit earthed via the negative polarity / U = 110 V_{dc} / Isc = 10 kA / In = 32 A

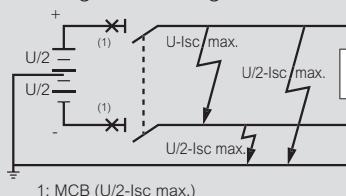

Protect the positive polarity using an MCB capable of breaking 10 kA at 110 V (DX³ 10000 2P 32 A with 2 poles on the positive polarity). For isolation, use a DX³ 10000 3P 32 A with 2 poles on the positive polarity and one pole on the negative polarity

DX ³ 10000	voltage	single-pole	2P	3P	4P
Acc. to IEC 60947.2 Icu	≤ 48 V	10 kA	10 kA		
	110 V		10 kA	10 kA	
	230 V				15 kA

• Network earthed via a middle point:

Place on each polarity the number of poles necessary for max. Isc breaking at half voltage

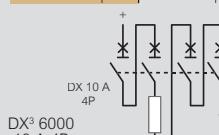

1: MCB (U/2-Isc max.)

Example: circuit earthed via a middle point / U = 230 V_{dc} / Isc = 6 kA / In = 10 A

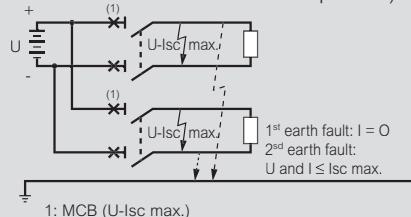

Protect each polarity using an MCB capable of breaking 6 kA at half voltage, i.e. 115 V (DX³ 6000 4P 10 A with 2 poles on each polarity)

DX ³ 6000	voltage	single-pole	2P	3P	4P
Acc. to IEC 60947.2 Icu	≤ 48 V	6 kA	6 kA		
	110 V		6 kA	6 kA	
	230 V				10 kA

• Isolated earth supply:

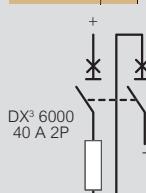

Distribute the poles necessary for breaking over the 2 polarities to provide protection in the event of a double earth fault (particularly if there are a number of circuits in parallel)

1: MCB (U-Isc max.)

Example: isolated earth circuit / U = 48 V_{dc} / Isc = 4.5 kA / In = 40 A. Protect the installation with an MCB capable of breaking 4.5 kA at 48 V and protect each polarity (DX³ 6000 MCB 2P 40 A with one pole on each polarity)

DX ³ 6000	voltage	single-pole	2P	3P	4P
Acc. to IEC 60947.2 Icu	≤ 48 V	6 kA	6 kA		
	110 V		6 kA	6 kA	
	230 V				10 kA

1	4 124 11	48 V	2 N/O		1
10	4 124 12	230 V	2 N/O		1
		4-pole - 16 A - 250 V~			
1	4 124 14	24 V	4 N/O		2
1	4 124 16	230 V	4 N/O		2
		Surface mounting pulse operated latching relays			
		10 A - 230 V~ - 50/60 Hz Suitable for new installations or retrofitting of existing ones Compatible with electronic ballasts and fluocompact lamps Mounting on plate or in flush-mounting boxes Ø 67 mm Equipped with automatic terminals for flexible or rigid wires (max. 2.5 mm) Power : min. 7 W / max. 2300 W IP 20 - IK 04 Dimensions: 49 x 46 x 26 mm Maximum current when used with illuminated push-buttons : 50 mA			
10	0 491 20	Noiseless			
10	0 491 21	Single pole Single pole with timer Enables energy savings by switching off lighting after a specified period Time delay adjustment from 1 to 60 min. Switch-off pre-warning function (can be disabled)			

Pack	Cat.Nos	Signalling auxiliary			
		Fitted on left-hand side of latching relay (equipped or not with control auxiliary) Maximum 2 auxiliaries per latching relay Used to signal the status of the contacts on the associated product			
1	4 124 29	I max. 5 A	Voltage 250 V~	Contact N/C + N/O	Number of modules 0.5
		Control auxiliary			
		Fitted on left-hand side of latching relay Maximum 1 control auxiliary per latching relay Compatible with signalling auxiliary Cat.No 4 124 29			
		Auxiliary device for centralized control			
		For a centralized control of different latching relays from one single point			
1	4 124 33	For latching relays 24 V~ to 48 V~			
1	4 124 34	For latching relays 230 V~			
1	4 124 36	For simultaneous control of different groups of latching relays, already fitted with auxiliary device for centralised control 230 V~ Cat.No 4 124 34			
1	4 124 37	Auxiliary device for maintained contact Allows the control of a latching relay via one maintained contact (i.e. time switches)			
		Compensator module			
		Used to control 230 V~ - 50 Hz pulse operated latching relays via illuminated push-buttons without malfunctions Connects to the terminals of the pulse operated latching relay coil Compensation: - 1 compensator module for a total consumption of 3 to 6 mA (example: 6 to 11 illuminated push-buttons consuming 0.55 mA each) - 2 compensators modules for a total consumption of 6 to 9 mA (example: 12 to 17 illuminated push-buttons with consuming 0.5 mA each)			
1	4 124 39	Impedance compensator for 230 V~ pulse operated latching relays			
		Number of modules 1			

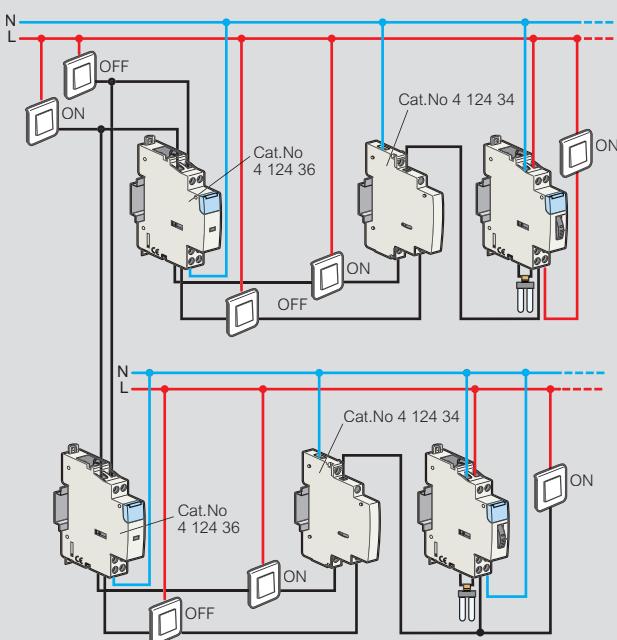

Pulse operated latching relays

Wiring diagrams

Signalling with auxiliary Cat.No 4 124 29

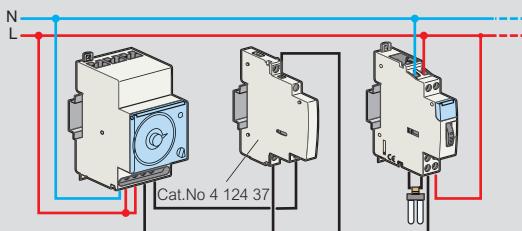

Centralized control at one point using auxiliary devices
Cat.Nos 4 124 34 and 4 124 36

Use only non illuminated push-buttons

Control via maintained contact using auxiliary device

Auxiliaries for contactors CX³

4 124 29

4 124 31

Signalling auxiliaries for contactors

Auxiliary changeover switch for all CX³ contactors
Used to signal the position status of the contacts on the product to which it is connected

For 1 module contactors 16 A to 25 A

Maximum 2 auxiliary devices per contactor
Fitted on left-hand side of contactor

Pack	Cat.Nos	I max	Voltage	Contact	Number of modules
1	4 124 29	5 A	250 V \sim	N/C + N/O	0.5

For 2 module contactors 25 A

Maximum 2 auxiliary devices per contactor
Fitted on left-hand side of contactor

Pack	Cat.Nos	I max	Voltage	Contact	Number of modules
1	4 124 30	5 A	250 V \sim	N/C + N/O	0.5

For 40 and 63 A contactors

Maximum 1 auxiliary device per contactor
Fitted on left-hand side of contactor

Pack	Cat.Nos	I max	Voltage	Contact	Number of modules
1	4 124 31	5 A	250 V \sim	N/C + N/O	0.5

Power contactors CX³

Technical characteristics

- Rated impulse withstand voltage (Uimp): 4 kV
- Mechanical endurance (no. of operating cycles): 10⁶ cycles
- Operating temperatures: - 25 °C to + 40 °C
- Storage temperatures: - 40 °C to + 70 °C

Contactor protection against short circuits according to standard EN 61095, conditional short-circuit current:

- I_q = 6 kA for 16 to 25 A contactors
- I_q = 3 kA for 40 to 63 A contactors

Circuit breaker or gG fuse rated:

- | | |
|--------------------------|--------------------------|
| • ≤ 16 A for 16 A rating | • ≤ 40 A for 40 A rating |
| • ≤ 25 A for 25 A rating | • ≤ 63 A for 63 A rating |

Consumption of a contactor control coil

		16 A and 25 A power contactors			
Coil voltage		24 V~		230 V~ low noise	
Current		16 A and 25 A	25 A	25 A	16 A and 25 A

Conform to EN 60730-1 and EN 60730-2-7

Digital daily weekly DIN rail mounting time switches
A programme consists of a ON and OFF time and their assignment to certain days of the week (or a combination of days) and a selected channel (for the 2-channel version).

Additional features:

- manual override (permanent ON or OFF)
- automatic override (ON/OFF): actual program will be inverted (ON->OFF, OFF->ON) till next programmed ON time
- working reserve : 3 years
- replaceable battery

10	4 126 02	Time-lag switch Resettable 230 V \sim - 50/60 Hz Timing adjustable from 0.5 sec to 10 min Manual override contact Output 16 A - 250 V \sim - $\mu \cos \varphi = 1$ 2000 W incandescent/halogen 2000 W halogen - 230 V \sim 1000 VA fluo - series compensated 120 VA fluo - parallel compensated 14 μF 100 VA compact fluorescent 1000 W energy saving lamp automatic 3-wire or 4-wire connection	1
10	0 047 04	Multi-function time-lag switch Resettable 230 V \sim - 50/60 Hz Timing adjustable from 0.5 sec to 12 min Operation with 3 or 4 wires automatically recognised by the time-lag switch - Inputs for separate control 8-230 V (presence detection, lighting control by door entry system etc.) - Switch-off pre-warning function, - Long duration function (1 hour) and manual switch-off Output 16 A - 250 V \sim - $\mu \cos \varphi = 1$ 3680 W incandescent/halogen 2000 W halogen 230 VA 1000 VA fluo - parallel compensated $\leq 100 \mu\text{F}$ 2000 VA compact fluorescent 500 W halogen lamp + ferromagnetic transformer 2000 W halogen lamp + electronic transformer - Specially suited to energy saving lamps 1000 W	1
1	0 497 83	Automatic staircase time-lag switch for wall mounting 230 V - 50 Hz Switches a lighting circuit during a determined period Controlled by illuminated push-button 50 mA max 3 wire connection Output : 1 contact Contact rating 10 A - 250 V \sim - $\cos \varphi = 1$ Type of delay adjustable Electronic 0.5 to 10 min.	1

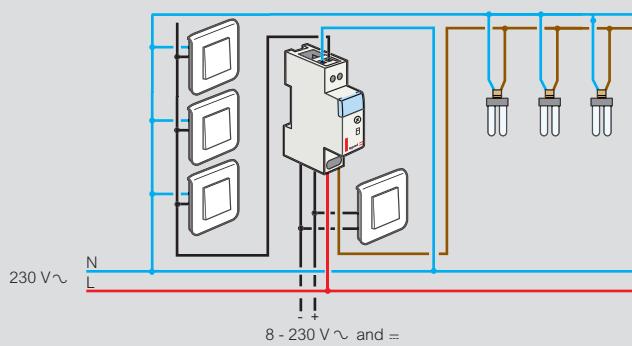

Electronic time-lag switches

Multi-function time-lag switch

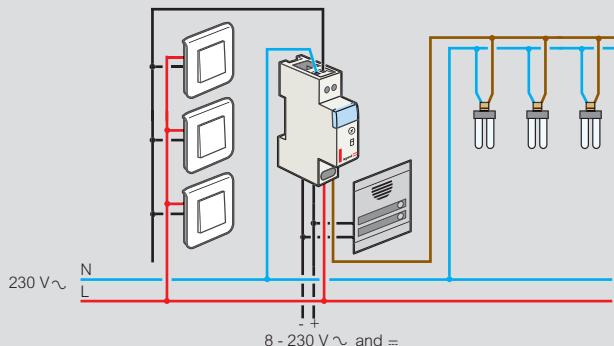

4-wire

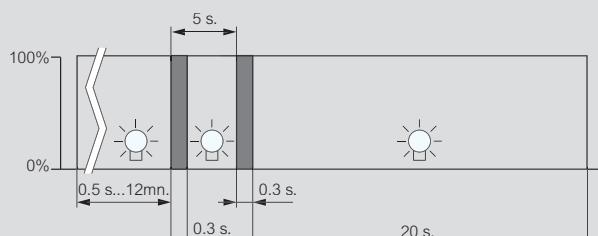

3-wire

Multi-function time-lag switch: lighting control by door entry system

Switch-off pre-warning function

For fluorescent and energy saving lamps the switch-off period is longer than 0.3 s, because of re-starting time required by the lamps

Light sensitive switches

4 126 23

4 126 26

4 128 58

Dimensions [see e-catalogue](#)

Can be used to switch a lighting circuit "ON" and "OFF" based on light conditions (nightfall, daybreak)

Supplied with IP 65 weatherproof photoelectric cell

Power supply: 230 V~ - 50/60 Hz

Pack	Cat.Nos	Standard

Remote control dimmers

0 026 71

0 036 71

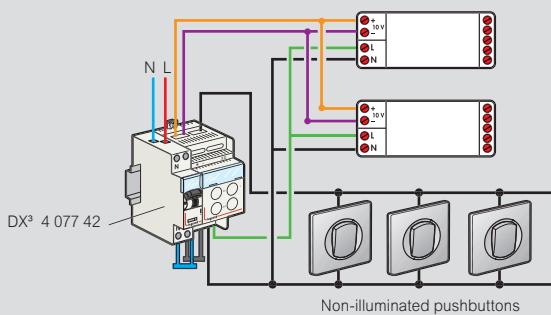

230 V~ - 50/60 Hz power supply

Pack	Cat.Nos	Remote control dimmers	Number of modules
Standalone operation			
1	0 036 58	<p>For fluorescent lamps with 1-10 V electronic ballast Controllable power: 800 VA Control current: 50 mA max. Local and remote control Dimming via non-illuminated 1-gang pushbutton</p>	2
1	0 026 71	<p>Compatible with energy-saving lamps (LEDs, CFLs) For loads: - 3 to 150 W LEDs/CFLs - 3 to 400 W for halogen lamps (built-in ballast) - 3 to 400 W for halogen lamps with electronic or ferromagnetic transformer Light level dimmed by holding down the button. Switch-off warning function 110-230 V, 50-60 Hz Max. standby consumption: 0.1 W DIN rail mounting Has space for inserting a supply busbar Can be installed instead of a remote control dimmer controlled via a pushbutton</p>	2
Operation on a BUS			
1	0 036 60	<p>Local and remote control via auxiliary controls or via pushbuttons, 1 or 2-gang, non-illuminated Supplied in 2-gang pushbutton version A 2-gang pushbutton (3 wires) can be changed to 1-gang (2 wires) by configuring the product Light indication of the load level via bargraph, which allows control to be viewed directly on the front panel. Can be combined with one another in master/slave mode by means of the BUS</p>	4
1	0 036 71	<p>For light sources with separate 1/10 V ballast (fluorescent tubes, compact fluorescent bulbs, LEDs, etc) Compatible with all loads which can be controlled by ballasts dimmable from 1 - 10 V Max. power: 1000 VA Control current: 50 mA max. For incandescent, halogen, ELV halogen lamps with ferromagnetic or electronic transformers Automatic recognition of the load Self-regulating against overloads Max. power: 1000 W</p>	6
Power supply for BUS line			
1	0 036 80	BUS power supply for remote controlled dimmers Cat.Nos 036 60/71 For maximum 8 peripherals	2

Time delay relays

12 to 230 VAC and DC

Dimensions [see e-catalogue](#)

For controlling the switching ON or OFF of a circuit (lighting, ventilation, automation, signalling) in operation for a specific time from 0.1 sec to 100 hrs
Supply voltage: 12 to 230 VAC (50/60 Hz) and DC
Output: 8 A - 250 VAC - $\mu \text{cos } \varphi = 1$ per inverter contact

Pack	Cat.Nos	Time delay relays	Pack	Cat.Nos	Time delay relays (continued)	Number of modules
1	0 047 40	ON delay Delays load switch-on (alarm, lighting, contactor)  The time period starts when the relay is switched ON. At the end of the time period (T), the load is switched ON	1	0 047 43	Timer (pulse) For switching a load ON for a specific time (contactor)  The time period (T) starts with the closing of the non-illuminated switch or pushbutton. At the end of the time period, the load is switched OFF	1
1	0 047 41	OFF delay Delays load switch-off (ventilation, etc.)  The time period (T) starts with the opening of the non-illuminated switch or pushbutton. At the end of the time period, the load is switched OFF	1	0 047 45	Wipe contact flick contactor For switching a load ON for a specific time  The time period (T) starts when the relay is switched ON. At the end of the time period (T), the load is switched OFF	1

Interfacing with IP communication network

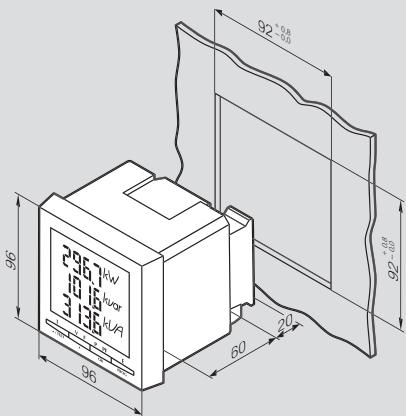

1: For direct connection meters
 If connected via transformers, the resolution and maximum indication depend on the transformation ratios of these transformers

EMDX³ multi-function measuring units

Pack	Cat.Nos	Single-phase solid core current transformers	
		Used with ammeters, electricity meters or multi-function measuring units	
		Current at the secondary: 5 A	
		Can be fixed on plate, EN 60715 ↗ rail	
		Cat.No 4 121 01/02/03/04/05/06/07, or bars	
		Secondary connected by terminals or lugs	
		Precision class: 0.5 % (1 % for Cat.No 4 121 01/02)	
		For 16 x 12.5 mm bar or Ø21 mm cable	
1	4 121 01	Transformation ratio 50/5	Output (VA) 1.25
1	4 121 02	75/5	1.5
1	4 121 03	100/5	2
1	4 121 04	125/5	2.5
1	4 121 05	160/5	3
1	4 121 06	200/5	4
1	4 121 07	250/5	5
		For 32.5 x 10.5 and 25.5 x 15.5 mm bars or Ø27 mm cable	
1	4 121 12	400/5	10
1	4 121 14	600/5	12
		For 40.5 x 12.5 and 32.5 x 15.5 mm bars or Ø26 mm cable	
1	4 121 16	250/5	3
1	4 121 17	400/5	6
1	4 121 19	700/5	8
		For 40.5 x 10.5, 32.5 x 20.5 and 25.5 x 25.5 mm bars or Ø32 mm cable	
1	4 121 23	250/5	3
1	4 121 24	300/5	5
1	4 121 25	400/5	8
1	4 121 26	600/5	12
		For 50.5 x 12.5 and 40.5 x 20.5 mm bars or Ø40 mm cable	
1	4 121 31	700/5	8
1	4 121 32	800/5	8
1	4 121 33	1000/5	10
		For 65 x 32 mm bar	
1	4 121 36	600/5	8
1	4 121 38	800/5	12
1	4 121 39	1000/5	15
		For 84 x 34 mm bar	
1	4 121 42	1250/5	12
		For 127 x 38 mm bar	
1	4 121 46	1600/5	10
1	4 121 47	2000/5	15
1	4 121 49	3200/5	25
		For 127 x 54 mm bar	
1	4 121 50	1600/5	20
1	4 121 51	2000/5	25
1	4 121 52	2500/5	30
1	4 121 53	3200/5	30
1	4 121 54	4000/5	30

Pack	Cat.Nos	Three-phase solid core current transformers	
		Used with ammeters, electricity meters or multi-function measuring units	
		Current at the secondary: 5 A	
		For fixing directly on bars	
		Secondary connected by terminals or lugs	
		Precision class: 1 %	
		For three 20.5 x 5.5 mm bars	
1	4 121 57	Transformation ratio 250/5	Output (VA) 3
		For three 30.5 x 5.5 mm bars	
1	4 121 58	400/5	4
		Single-phase split-core current transformers	
		Used with ammeters, electricity meters or multi-function measuring units	
		Current at the secondary: 5 A	
		For fixing directly on bars	
		Secondary connected by terminals or lugs	
		Precision class: 0.5 %	
		For 50 x 80 mm bar	
1	4 121 62	Transformation ratio 400/5	Output (VA) 1.5
1	4 121 63	800/5	3
		For 80 x 120 mm bar	
1	4 121 64	1000/5	5
1	4 121 65	1500/5	8
		For 80 x 160 mm bar	
1	4 121 66	2000/5	15
1	4 121 67	2500/5	15
1	4 121 68	3000/5	20
1	4 121 69	4000/5	20
		Viking 3 disconnector block for measurement - 1 connection	
		With its accessories, allows intervention (measurement, maintenance, etc) on a current, voltage and power measuring circuit by keeping the current transformer secondary circuit closed
